EXECUTIVE SUMMARY

The major findings of the 2006 SIAST Graduate Employment Survey (GES) are listed below. For comparison, the 2004 figures are included in brackets. The results below identify SIAST-wide figures. Divisional, as well as core and extension program breakdowns are identified in the *Overview of Results* section and the results on program data are located in the program pages at the end of the report.

- Graduates that received credentials in the time period July 2005 – October 2006 were surveyed.
- Where possible, for comparison, figures from the last survey conducted in 2004, are included in brackets.
- **3,719** (4,194) **graduates were surveyed**, 2,500 from core programs, and 1,219 from extension programs.
- The 3,719 graduates received credentials from **139 distinct programs**.
- The following credentials were awarded: applied certificate (574), certificate (2238), advanced certificate (130), and diploma (777).
- Of the 3,719 surveyed graduates, 1,699 (2,071) responded, for an overall **response rate of 45.7%** (49%).
- 1,184 of the respondents were graduates from core programs, for a response rate of 47% (52%), while the remaining 515 respondents were from extension programs, for a response rate of 42% (44%).
- **63%** (61%) of respondents reported **seeking employment in this field** as the primary reason for completing their programs.
- **92%** (91%) of respondents **who were available to work** were **employed (employment rate)**.
- **74%** (79%) of available to work respondents were **in training-related occupations**
- **71%** (64%) of available to work respondents were employed in **full-time** occupations and **58%** (50%) of the available for work respondents were employed in **full-time training-related** occupations.
- **23%** (29%) of employed respondents were **working part-time or casually**, and of these, **49%** (42%) reported that the part-time work was **by choice**.
- **7%** (7%) of employed respondents indicated that they were **self-employed**.
- The **average salary** for respondents in **full-time training-related** employment was **$2,688** ($2,491) per month.
- **92%** (92%) of employed respondents were **working in Saskatchewan**. **52%** (44%) of this figure were working either **in Regina or Saskatoon**.
- **8%** (8%) indicated they were **working outside Saskatchewan,** and of that figure, **74%** (68%) reported that this was **by choice**. Of the 8% (8%) that reported working outside Saskatchewan, **35%** (44%) indicated **personal reasons** as the primary reason for leaving the province.
- Of those respondents who reported they were not working at the time of the survey, **71%** (60%) of them indicated that they **had worked** at some time since graduation, and **44%** (49%) reported that they were scheduled to return to work in the future.

- **53%** (79%) of respondents that had worked but were not employed at the time of the survey indicated that the work had been directly related to the education and training they received in their programs.

- **54%** (46%) of respondents, who were not employed, indicated they were **not looking** for work, primarily because they were enrolled in further education.

- The primary reasons the unemployed respondents were not currently employed was that they were **not available to work at present (30%)**, or they **required further training (21%;** 18%).

- **25%** (45%) of respondents indicated that they were **enrolled in further education.** Of this figure, **56%** were **enrolled in a SIAST program** – either the same SIAST program (different credential) or a different program altogether.

- **64%** (67%) of those in further education or training indicated that they were employed at the time of the survey.

- **96%** (97%) of all respondents **rated the overall program quality at SIAST as *good* to *excellent*.**

- **74%** of all employed respondents indicated that they were ***satisfied* or *very satisfied* with how well the training program prepared them for employment in their field of study**.

- The **average age** of all respondents was **28** (29) years. The average age level was lower in the core programs, at 26 (28) years of age, and much higher in the extension programs at 32 (32) years of age.

- **62%** (57%) of respondents were **female**, **38%** (43%) were **male**.

- **12%** (16%) of respondents identified themselves as being of **Aboriginal** origin. The Aboriginal respondents identified themselves as **38%** (36%) Status/Treaty Indian, **55%** (59%) as Métis, **6%** (5%) as Non-Status Indian, and **2%** as Inuit.

- **5%** (6%) of respondents indicated that they were **persons with disabilities** and **6%** (7%) identified themselves as members of a **visible minority**.

INTRODUCTION

1.0 Introduction

The SIAST Graduate Employment Report is produced from data collected in the SIAST Graduate Employment Survey (GES). The survey collects data from a variety of questions relating to the employment status, evaluation of training, and general demographic characteristics of SIAST's graduates.

SIAST is committed to ensuring the success of individuals who have completed one of the institute's programs. Graduate feedback from the survey provides valuable information about the quality of training and the success of SIAST graduates in the labour market. A wide range of stakeholders, from SIAST management, government, high school students and career counselors, labour analysts, and policy administrators, use the Graduate Employment Report as a reference document in program and labour market review and planning. The Institutional Research & Analysis (IR&A) unit at SIAST was the project lead on the survey.

1.1 Scope

The 2006 SIAST GES collected data from those 3,719 graduates who completed a SIAST program of study and graduated between July 2005 and October 2006.

In the 2005-2006 academic year, SIAST had graduates from a total of 139 distinct credentialed programs. SIAST core programs are defined as SIAST programs funded by the core budget and are typically offered at one or more of the institute's campus locations: Kelsey (Saskatoon), Palliser (Moose Jaw), Wascana (Regina) and Woodland (Prince Albert). These programs are often referred to as on-campus programs.

Many SIAST programs are also offered off-campus throughout the province, and these are considered extension programs. SIAST extension programs are generally cost-recovery and are offered throughout the province in a variety of delivery formats: with partners, via distance education learning and in industry-based training formats. Effective July 2007, extension programs will be titled continuing education programs.

All programs at SIAST are clustered and reported within one of the following six program divisions:

Business and Entrepreneurial Studies	Community Services
Industrial Training	Nursing
Science and Health	Technology

One of the following four credentials is awarded for each SIAST program: *Applied Certificate, Certificate, Advanced Certificate,* and *Diploma.* In some instances a program may have both a certificate and diploma level exit credential.

In order to have programs that are current, SIAST continually reviews the program mix. Some programs may have recently been deleted but graduates were permitted to complete their programs and graduate. Some programs have been re-titled or re-credentialed. Appendix A lists changes to the programs offered.

1.2 Methodology

Data Collection and Analysis

In order to obtain a sufficient sample to assess the success of graduates by program, a census of SIAST graduates within an academic year was undertaken for the GES. The graduate contact list, including telephone numbers and mailing addresses, was provided by Registration Services at SIAST. All SIAST graduates, as defined in the list provided by the Registration Services office, were surveyed.

In the 2006 GES, 3,719 graduates, who completed their programs between July 2005 and October 2006 were surveyed. The respondents represented graduates from 139 programs. As well there were a number of programs that were offered but did not have graduates within the July 2005 to October 2006 period.

The data collection process consisted of three phases, which occurred between December 2006 and April 2007. The first was a mail out of a self-administered paper survey to all 3,719 graduates. In December 2006, each graduate received the questionnaire to complete, along with a letter explaining the purpose of the study. Those graduates who did not respond to the mail-out questionnaires by February, 2007 were subsequently contacted by telephone in March/April of 2007 and asked to complete the questionnaire one-on-one with an interviewer. Norsask Consumer Interviewing Services Ltd. of Saskatoon conducted the telephone interviews. Every effort was made by both processes to contact the graduates in order to provide the highest possible response rate.

A new process was instituted for the survey in order to increase the response rate of graduates. IR&A obtained from Registration Services the list of SIAST and other (if available) email addresses of all graduates. IR&A was aware that, though graduates are permitted to retain and use their SIAST email addresses, it is difficult to determine how many actually do, hence the provision of additional email addresses for many of the graduates from the Registration Services. All graduates were sent an email with the link to access and complete the survey online. Though a good percentage of graduates had already responded to the survey, either by the mail or telephone method, the intention was to encourage those that had not already responded. Those that had already responded were informed not to re-submit a survey. As well, the link to the survey was placed on the SIAST web-site for graduates to complete. To encourage graduates to complete the survey, a draw to win an iPod was used as an incentive. All responding SIAST graduates, regardless of the method of response, were included in the draw for the iPod.

IR&A piloted a new method this year for collecting the responses from the graduates – using the Perseus Enterprise web-based survey tool. The purpose of this method was for respondents to directly enter their own responses to the questions in the survey and therefore avoid any misinterpretation of responses when entered manually, though the responses from the mail-in portion of the survey (paper version) had to be manually entered by SIAST staff. IR&A is developing new measures to have all future graduate employment surveys completed online.

The responses from graduates by the different methods of surveying were merged, checked for accuracy, consistency, and then analyzed using the Statistical Package for Social Science (SPSS) software.

1.3 Response Rate and Validity of Results

In order to obtain reliable information at the program level, a census of all SIAST students was undertaken. A total of 1,699 of 3,719 graduates participated in the 2006 GES, for an overall response rate of 46 percent. While participation dropped slightly from the previous survey in 2004 (49 percent), the large number of graduates that responded represent a broad and proportionate cross-section of SIAST programming, division, campus location, and student demographics. This degree of representation means that the results accurately portray the experiences and success of 2005-06 SIAST graduates overall.

Note on Response Rates by Program: When viewing individual program pages, the survey results for programs with a small number of graduates and a low response rate (i.e., less than 30%) may provide a good indication of graduate success and training quality, but may not be representative of the experiences of *all graduates* from that program. In these cases, generalizations to the graduates from the program who did not participate in the survey should be made with caution.

Table 1 provides the response rates for SIAST overall, by division, and by core/extension.

As mentioned above, SIAST's Graduate Employment Survey is unique because, rather than survey a sample of the 2006 SIAST graduates, a full census was undertaken with every graduate receiving an invitation to participate. SIAST is a post-secondary institution offering more than 139 distinct programs at four urban campuses as well as numerous rural locations. Some of these programs have less than thirty graduates, which make it impossible to survey a sample of the graduates and obtain meaningful results at the individual program level.

Table 1: Survey Response Rate, by Division, by Core/Extension, 2006

2006	Graduates	Respondents	Response Rate
SIAST Overall Programs by Division			
Business and Entrepreneurial Studies	777	434	56%
Community Services	757	346	46%
Industrial Training	650	221	34%
Nursing	226	108	48%
Science and Health	759	331	44%
Technology	550	259	47%
Total SIAST Programs	**3719**	**1699**	**46%**
SIAST Core Programs by Division			
Business and Entrepreneurial Studies	508	290	57%
Community Services	469	225	48%
Industrial Training	403	134	33%
Nursing	163	81	50%
Science and Health	496	226	46%
Technology	461	228	49%
Total SIAST Core Programs	**2500**	**1184**	**47%**
SIAST Extension Programs by Division			
Business and Entrepreneurial Studies	269	144	54%
Community Services	288	121	42%
Industrial Training	247	87	35%
Nursing	63	27	43%
Science and Health	263	105	40%
Technology	89	31	35%
Total SIAST Extension Programs	**1219**	**515**	**42%**

1.4 Reporting of Results

The findings of the analysis are presented in the *Overview of Results*. The *Overview of Results* summarizes the survey results in text, tables and graphs format. The areas examined in this section include employment status, continuing education, program assessment and general graduate demographics.

The results of the study for each question are provided by SIAST overall, as well as by core (on-campus) and extension (off-campus - number of locations throughout the province), as well as the six SIAST program divisions.

Employment information is presented as a percentage of those graduates available to work. According to Statistics Canada, the a*vailable to work* is defined as the *labour force* and includes those that are currently employed, as well as those not currently employed but who are seeking employment.

The percentage results throughout the report have been rounded to the nearest whole percentage and therefore in some cases the total percentages may vary slightly from 100%.

In presenting the results, the total number of graduates responding to each question will vary because: a) respondents did not always provide an answer to each question; and/or b) some questions were not relevant to all respondents. For example, some questions were asked only of those who were currently employed at the time of the survey, and conversely, other questions were asked only of those who were not currently employed at the time of the survey.

The *Appendices* section at the back of the report contains a listing of programs that have recently been revised, either re-titled, identified with different credentials, or deleted (appendix A); a copy of the survey questionnaire (appendix B); a question-by-question response count (appendix C); general SIAST information (appendix D); a list of tables (appendix E); and a list of graphs (appendix F).

The 2006 SIAST GES report was compiled from an analysis of the results of the survey.

OVERVIEW OF RESULTS

2.0 Employment

Respondents were asked to respond to a number of questions regarding their ability to secure employment after graduation, as well as the details of that employment, such as status (full or part-time), location, number of jobs held, and the relationship of employment to training.

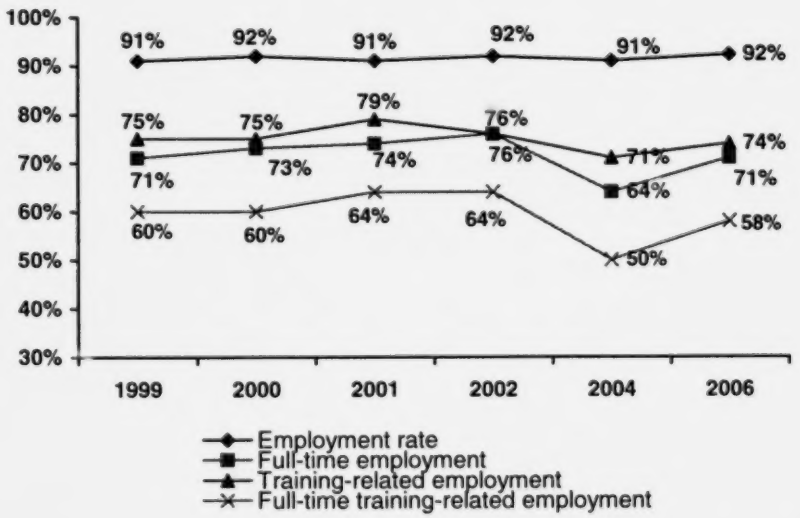
2.1 Employment Rates

2.1.1 Employment Rates for SIAST Overall

The following employment rates are calculated based on those respondents who are ***available to work***. The respondents who are included in the available to work category are those *who were employed at the time of the survey and those who were not employed but were looking for work* (Statistics Canada's definition of the *Labour Force*).

In the 2006 GES, the overall employment rate for all respondents was 92 percent. Graph 1 illustrates that the employment rate has remained relatively constant, fluctuating by one percent over the past six years that the survey has been conducted. In contrast, full-time and training-related employment rates have increased considerably since 2004

Graph 1: Employment Trends for SIAST Graduates, Based on Available Workforce, 1999-2006



The 2006 GES results indicate that respondents are finding employment that is both full-time and training-related.

The level of full-time employment reported by SIAST respondents surveyed increased to 71 percent, in 2006, as did the proportion of respondents who were able to obtain training-related employment at the time of the survey, which increased to 74 percent.

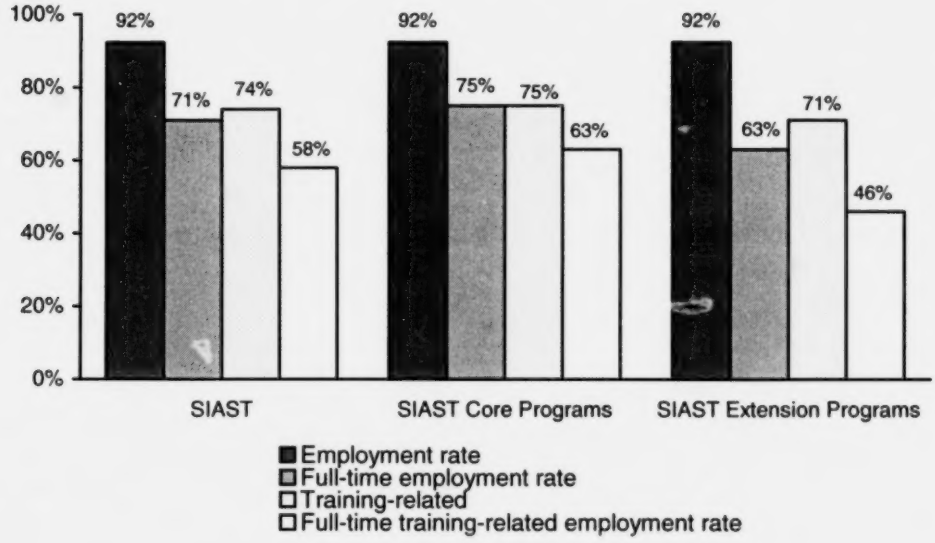
The proportion of respondents who were able to find full-time employment in a training-related field has increased to 58 percent. It is anticipated that this percentage will continue to increase with the current job situation in the province.

2.1.2 Employment Rates for Core and Extension Programs Overall

Graph 2 compares the employment rates for core and extension programs in 2006, with that of SIAST overall. The employment rate for core programs and extension programs (92 percent) matched the SIAST overall employment rate. As noted in the graph, the other employment rates for core programming were higher than the SIAST averages.

The full-time employment rate (63 percent), training-related employment rate (71 percent), and full-time training-related employment rate (46 percent) for extension programming were lower than the SIAST averages.

Graph 2: Employment Rates, by Core/Extension, Based on Available Workforce, 2006



2.1.3 Employment Rates by Division Overall (Core and Extension Combined)

Graph 3 provides a breakdown of employment rates for each of the six program divisions.

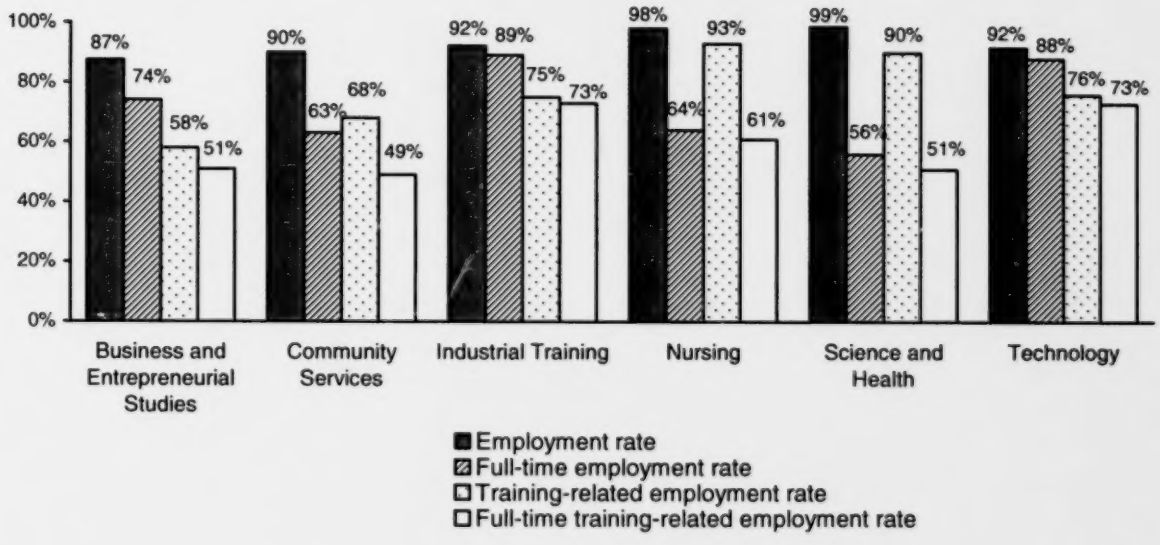
The higher employment rates in the following four divisions: industrial training (92 percent), nursing (98 percent), science and health (99 percent) and technology (92 percent) pulled the overall SIAST rate to 92 percent. The remaining two divisions have employment rates below the overall SIAST average.

Similarly, the same four divisions: industrial training (75 percent), nursing (93 percent), science and health (90 percent), and technology (76 percent) pulled the overall SIAST training-related employment rate to 74 percent. The business and entrepreneurial studies division had the smallest proportion of students in training-related employment, at 58 percent.

It is interesting to note that respondents in the business and entrepreneurial studies, with a lower than average training-related employment rate at 58 percent, actually had a full-time employment rate that was higher than the SIAST overall (74 percent).

With the current shortage of trades people in the province, it was not surprising to note that respondents in both the industrial training and technology divisions reported a 73 percent full-time training-related employment rate; against the 58 percent SIAST overall full-time training-related employment rate.

Graph 3: Employment Rates, by Division, Based on Available Workforce, 2006



2.1.4 Employment Rates by Division (Core and Extension Reported Separately)

Table 2 provides a further breakdown of employment rates by division for core and extension programming. The divisions of nursing and science and health, both core and extension, report higher employment rates, at 98 percent for core and 100 percent for extension programs. For the most part, respondents from SIAST's extension programs by division reported higher employment rates than those in core programs, with the exception of the industrial training and technology divisions.

Respondents from the science and health division extension program (28 percent) and business and entrepreneurial studies division extension program (42 percent) had the most difficult time finding full-time training-related employment.

Many of the employment opportunities in the health related programs (e.g., medical diagnostics), are located in the larger urban centres of the province. When respondents from these programs are willing to move, they may not be successful in securing full-time training-related employment opportunities.

Table 2: Employment Rates, by Division, by Core/Extension, Based on Available Workforce, 2006

	Available for work	Employment rate	Full-time employment rate	Training-related employment rate	Full-time training-related employment rate
SIAST Core Programs by Division					
Business and Entrepreneurial Studies	253	87%	75%	61%	55%

OVERALL SIAST TOTAL	1557	92%	71%	74%	58%

2.1.5 Employment Rates for Aboriginal Respondents

The employment rate for Aboriginal respondents in the survey was 84 percent overall, less than that of the total SIAST respondents (92 percent). Similarly, the Aboriginal full-time employment rate of 60 percent and full-time training-related employment rate of 46 percent were lower than for all SIAST respondents (71 percent and 58 percent, respectively). The percentages of Aboriginals employed has increased over the 2004 results of 55 percent full-time and 40 percent full-time training related employment rates.

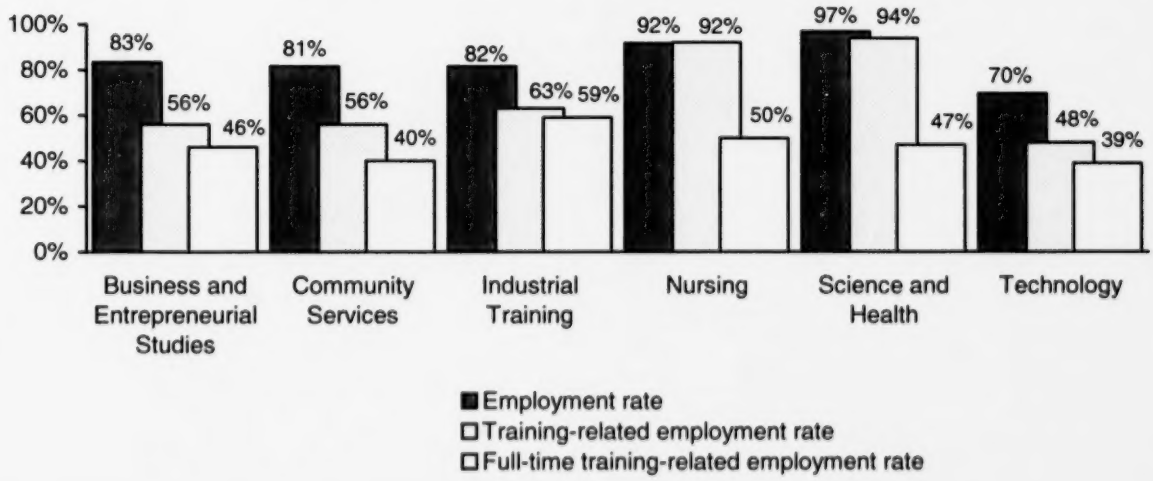
Both the nursing division (at 92 percent for training-related employment rate) and the science and health division (at 97 percent for employment rate and 94 percent for training-related employment rate) showed encouraging results for the Aboriginal respondents in these divisions.

The employment rates by division for those available to work were:

- Business and Entrepreneurial Studies 83%
- Community Services 81%
- Industrial Training 82%
- Nursing 92%
- Science and Health 97%
- Technology 70%

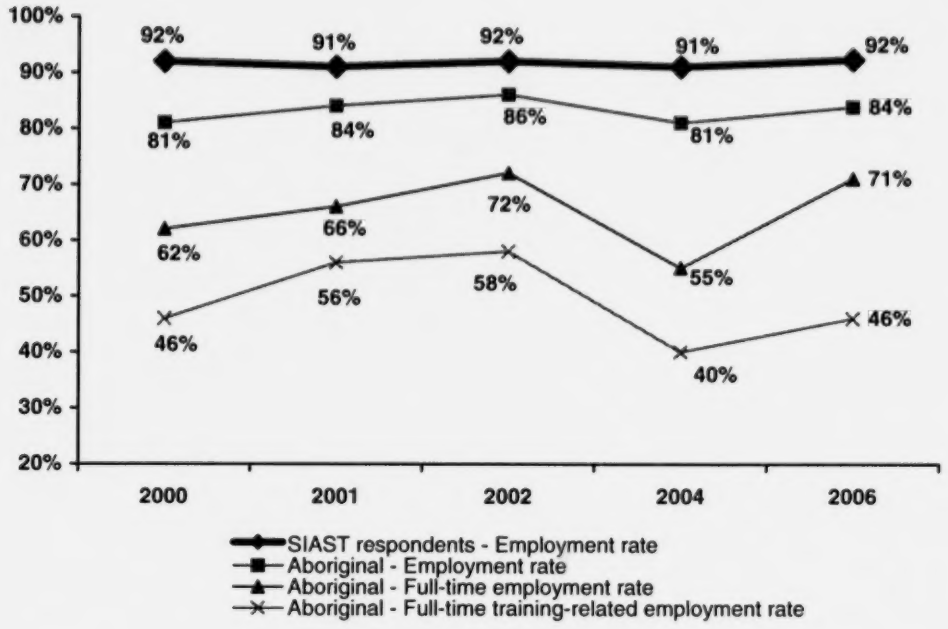
Graph 4 indicates the employment rates, training-related employment rates, and full-time training-related employment rates by division for Aboriginal respondents. This includes core and extension programs.

Graph 4: Employment Rates for Aboriginal Respondents, by Division, Based on Available Workforce, 2006



Employment rates in 2006 for Aboriginal respondents have increased from 2004 in the business and entrepreneurial studies, industrial training, science and health, and technology divisions and were more consistent with those rates in the 2000 survey. Similarly, the employment rates for all respondents to the survey have increased from the rates in 2004. The survey was not conducted in 2003, therefore no data is available for that year. Graph 5 provides a five-year trend of employment rates for the Aboriginal respondents, which again shows the increase in the employment rates.

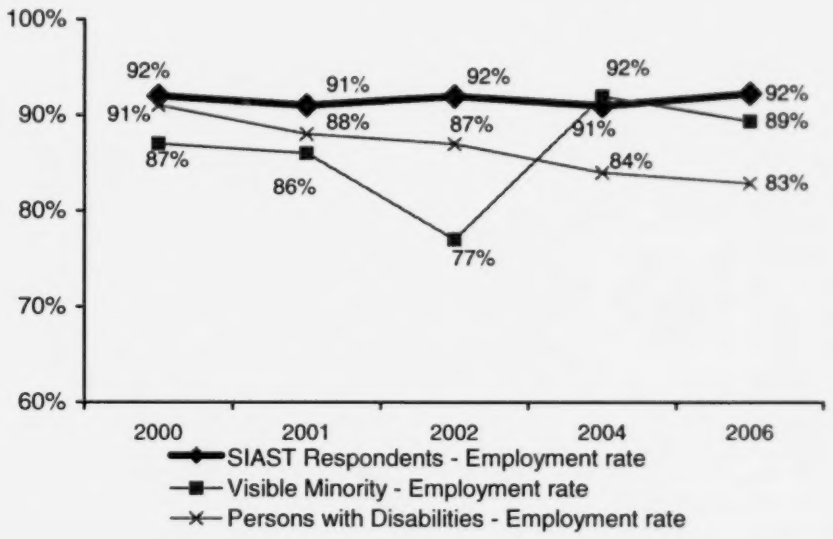
Graph 5: Employment Trends for Aboriginal Respondents, Based on Available Workforce, 2000-2006



2.1.6 Employment Trends for Persons with Disabilities and the Visible Minority Respondents

The employment rate for persons with disabilities and visible minority respondents was 83 percent and 89 percent respectively. The visible minority employment rate in 2006 was slightly lower than the SIAST overall rate of 92 percent. As Graph 6 depicts, the percentages for the five-year trend for both persons with disabilities and the visible minority are fairly consistent, except for a drop in the visible minority employment rate in 2002.

Graph 6: Employment Trends for Persons with Disabilities and Visible Minority Respondents, Based on Available Workforce, 2000-2006



Note: Two types of ratios have been included in the Graduate Employment Report for questions pertaining to employment status and training-related employment. The above *employment rates* (Sections 2.1.1 through 2.1.6) have been standardized using the *available workforce* as the divisor. They do not represent the actual percentage of graduates who responded to the respective employment questions in the survey.

For example, 1437 graduates responded to the question regarding employment status (full-time versus part-time). Of these, 1111 respondents indicated that they are employed full-time. In calculating the full-time employment rate listed in the sections mentioned above, the 1111 responses are divided by the available workforce total – 1557 (comprised of 1437 respondents employed and 120 respondents actively seeking employment), for a full-time employment rate of 71 percent.

As mentioned in section 2.1.1, the available workforce are those respondents who are employed and those who are not employed but are looking for work.

In the remaining sections of the report, the employment-related percentages have been calculated based upon the total number of graduates who responded to the specific questions. For example, in reporting employment status (Section 2.3.1), the frequency for those respondents with a full-time status (77 percent), was calculated by dividing the 1111 respondents who indicated they are employed full-time by the 1437 respondents who responded to the question.

2.2 *Training-Related Employment*

Are you employed in a job directly related to the education and training you received in your program at SIAST? (Question 23)

If yes, is this training-related job your primary job? (Question 24)

The majority of respondents obtained employment which was directly related to their training; 81 percent of all employed SIAST respondents were working at training-related jobs at the time of the survey (Graph 7). Overall, this is higher than that reported in 2004. Respondents from the nursing (94 percent) and science and health (93 percent) divisions had the most success in obtaining training-related employment.

Graph 7: Training-Related Employment, by Division, 2006

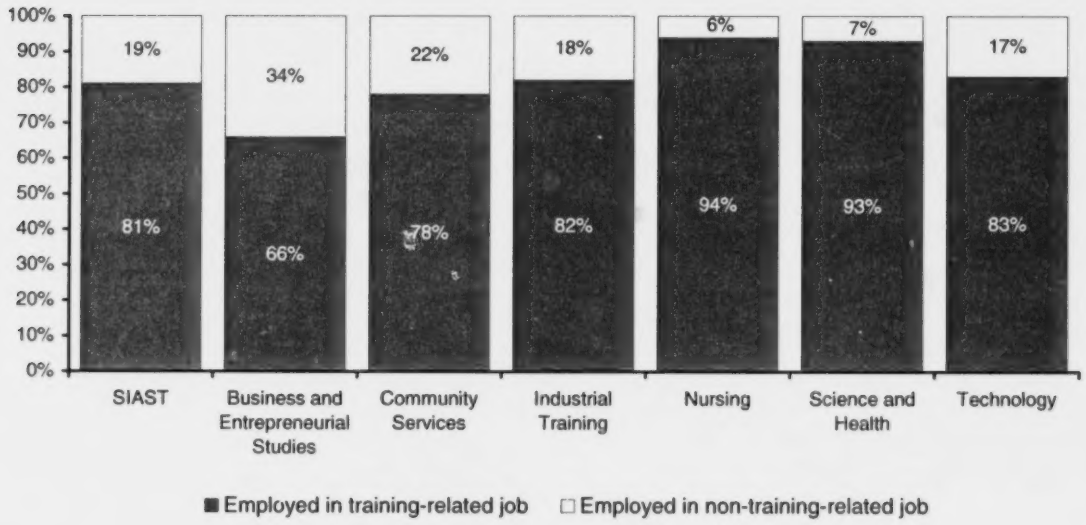


Table 3 provides a breakdown of training-related employment by core and extension programming for each division. As mentioned previously, the nursing and science and health divisions had the largest percentage of respondents with training-related employment. Respondents from extension programs in these divisions did slightly better than their peers from core programs. In many of the nursing and science and health programs, respondents are required to have completed their training and be licensed by a national accrediting agency before practicing their skills in the health field.

Table 3: Training-Related Employment, by Division, by Core/Extension, 2006

	Total respondents	Number Employed in training-related job	Percent Employed in training-related job
SIAST Core Programs by Division			
Business and Entrepreneurial Studies	220	155	71%
Community Services	172	132	77%

Nursing	27	26	96%
Science and Health	103	96	93%
Technology	27	20	74%
Total SIAST Extension Programs	426	329	77%
OVERALL SIAST TOTAL	1423	1150	81%

2.3 Employment Status

2.3.1 Full or Part-time/Casual Employment

Graduates were surveyed to determine the type of primary employment they had secured. The formula, developed by Statistics Canada, defines the hours for full- and part-time work. In the 2006 survey, respondents were also asked to identify if their employment was of a casual nature.

What is your employment status of your primary job: (Question 16)
a) Full-time (30 hours or more per week),
b) Part-time (less than 30 hours per week),
c) Casual (variety of hours per week)
d) Other (please specify) _____

Full-time employment is defined as working 30 hours or more per week and part-time and casual employment are defined as working less than 30 hours per week. Overall, 77 percent of all SIAST respondents surveyed were working full-time in their primary job; while 23 percent of respondents had a primary job that was part-time or casual. The proportion of respondents who reported part-time and casual employment in their primary jobs has dropped 6 percent since 2004.

The industrial training and technology divisions had the largest proportions of respondents with full-time employment in their primary job. Although respondents in the nursing and science and health divisions had the largest proportion of respondents with training-related employment, they were the least likely to have full-time employment. Community services also had relatively fewer respondents in full-time employment (Graph 8).

Graph 8: Full or Part-Time Employment in Primary Job, by Division, 2006

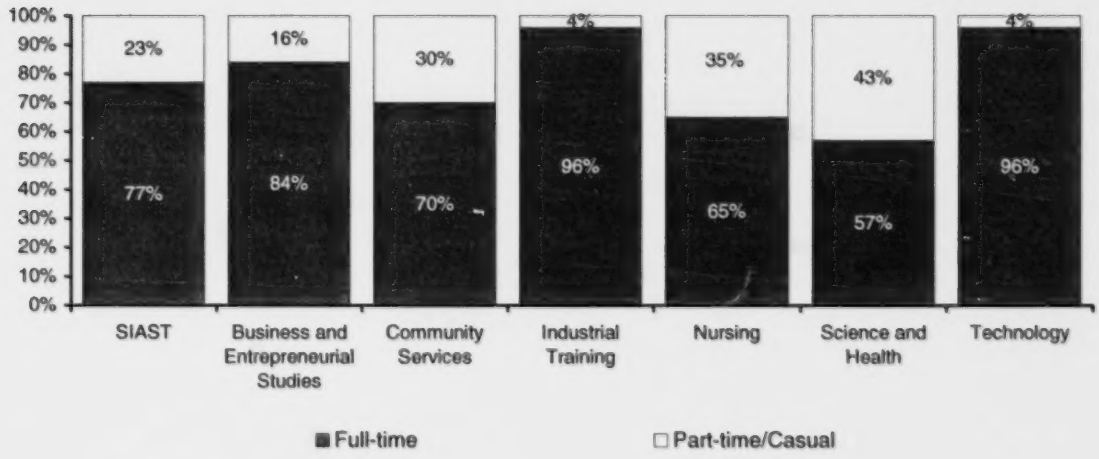

Table 4 provides the breakdown of employment status by core and extension programming for each division. In general, respondents from extension programs were less likely to be employed full-time, with a 68 percent full-time employment rate overall. Over three-quarters of respondents in core programs (81 percent) were employed on a full-time basis.

Table 4: Full or Part-Time Employment in Primary Job, by Division, by Core/Extension, 2006

	Total Respondents	Full-time	Part-time/ Casual
SIAST Core Programs by Division			
Business and Entrepreneurial Studies	220	86%	14%
Community Services	176	68%	32%
Industrial Training	121	98%	2%
Nursing	79	70%	30%
Science and Health	213	69%	31%
Technology	198	95%	5%
Total SIAST Core Programs	1007	81%	19%
SIAST Extension Programs by Division			
Business and Entrepreneurial Studies	114	79%	21%
Community Services	90	73%	27%
Industrial Training	68	93%	7%
Nursing	27	52%	48%
Science and Health	104	33%	67%
Technology	27	100%	0%
Total SIAST Extension Programs	430	68%	32%
OVERALL SIAST TOTAL	1437	77%	23%

2.3.2 *Part-time/Casual Position – by Choice*

If your primary job is a part-time or casual position, is this by choice? (Question 17)

It is assumed that those working in part-time or casual jobs do so because they can not secure full-time employment. This particular question had been added to the GES in 2002, 2004 and again in 2006 in order to clarify if graduates wanted to work in part-time or casual positions. In 2006, the percentage of respondents who indicated they chose to work part-time/casual was more than those of the last study. Overall, 49 percent of respondents were working part-time or casual by choice, compared to 42 percent in 2004.

Overall, the community services (61 percent) and nursing (64 percent) divisions had the highest proportions of respondents who were working part-time by choice. Industrial training division respondents were the least likely to work part-time by choice (20 percent overall). Again the current shortage of trades people in the province is playing a factor in that the majority of skilled trades people are working full-time. Forty-two percent of employed business and entrepreneurial studies and science and health respondents were employed part-time by choice, as were 33 percent of the technology division respondents.

Table 5 provides a breakdown of part-time employment by choice for core and extension programming by division. In core programming, nursing respondents were most likely to be employed part-time by choice, whereas the community services division had the highest proportion in the extension programs.

Table 5: Part-Time or Casual by Choice, by Division, by Core/Extension, 2006

	Total Respondents	Part-time/ Casual by choice
SIAST Core Programs by Division		
Business and Entrepreneurial Studies	30	33%
Community Services	53	64%
Industrial Training	3	33%
Nursing	23	78%
Science and Health	63	35%
Technology	9	33%
Total SIAST Core Programs	181	49%
SIAST Extension Programs by Division		
Business and Entrepreneurial Studies	23	52%
Community Services	24	54%
Industrial Training	2	0%
Nursing	13	39%
Science and Health	69	49%
Technology *	---	---
Total SIAST Extension Programs	131	49%
OVERALL SIAST TOTAL	312	49%

** Respondents in extension programs in the technology division indicated that they were all full-time employed.*

2.3.3 Self-Employed

Are you Self-Employed? (Question 14)

The percentage of respondents indicating that they were self-employed remains fairly low. Overall, 7 percent of all the respondents indicated their desire for entrepreneurship, the same percentage from the 2004 survey. The greatest interest came from business and entrepreneurial respondents in core programs (9 percent) and 18 percent industrial training respondents in extension programs (Table 6).

Table 6: Self-Employment, by Division, by Core/ Extension, 2006

	Total Respondents	Self-employed

Nursing	27	0%
Science and Health	104	10%
Technology	27	4%
Total SIAST Extension Programs	430	9%
OVERALL SIAST TOTAL	1437	7%

2.3.4 Number of Jobs

How many jobs do you currently have? (Question 13)

Census results from Statistics Canada indicated that many in today's labour force had multiple jobs and that this trend would continue. Results of the GES confirm this fact. The average number of jobs that all respondents from both core and extension programs had was two. The maximum number of jobs held by some respondents in core programs was seven – in community services. The maximum number of jobs held in the extension programs was five, and this was in the industrial training and nursing programs (Table 7).

Table 7: Number of Current Jobs Held, by Division, by Core/Extension, 2006

	Total Respondents	Average	Maximum
SIAST Core Programs by Division			
Business and Entrepreneurial Studies	219	2	4
Community Services	176	2	7
Industrial Training	120	2	3
Nursing	79	2	6

OVERALL SIAST TOTAL	1433	2	7

3.0 Salaries

Employed respondents were asked to indicate the salary they earned. Some gave an hourly rate and others a monthly salary. All identified salaries were calculated to a monthly rate.

3.1 Salaries for SIAST Respondents

What is the hourly salary of your primary job before deductions? (Question 18)

The average (mean) monthly full-time training-related salary for all respondents was $2,688, an increase of approximately $200 per month from two years ago.

The minimum wage in Saskatchewan, since November 2006, has been $7.55 per hour. Based on a 37.50 hour work week, the minimum monthly salary for a full-time employee is $1,132.50 [7.55 X 37.50 X4]. The majority of SIAST employed respondents were paid at a higher level than this rate (Table 8).

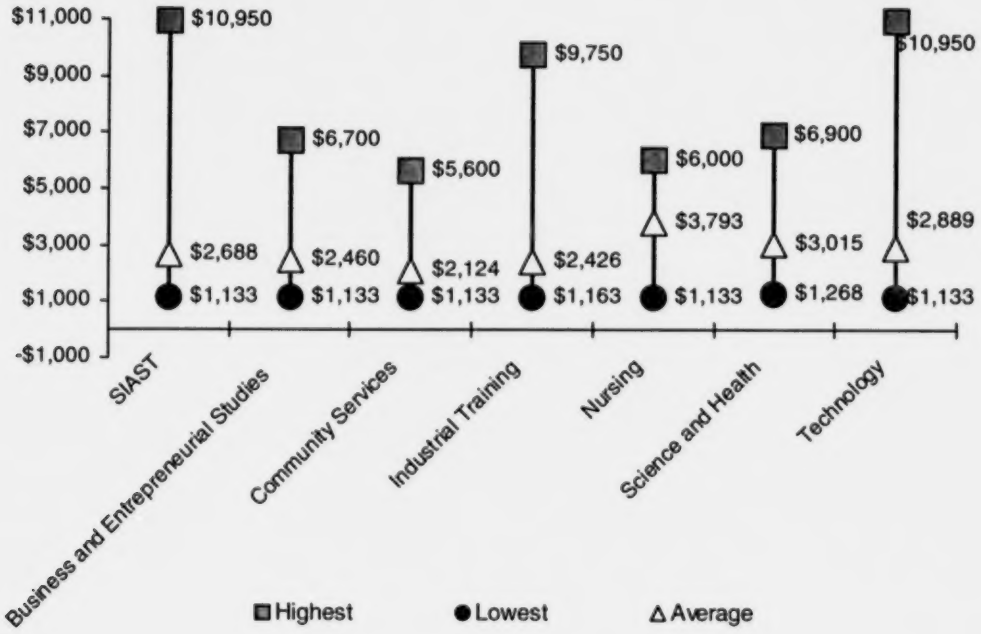
Two respondents, one in each of the industrial training and technology divisions, recorded the highest monthly salaries for training-related employment, at $9,750 and $10,950 respectively. Historically, respondents from the technology division working in the oil fields have reported high salary levels.

Table 8: Monthly Salary of Full-Time Training-Related Job, by Core/Extension, 2006

	Total Respondents	Highest	Average	Median	Lowest
Total SIAST Core Programs	646	$10,950	$2,728	$2,550	$1,133
Total SIAST Extension Programs	204	$9,750	$2,558	$2,327	$1,133
OVERALL SIAST TOTAL	**850**	**$10,950**	**$2,688**	**$2,503**	**$1,133**

As mentioned above, the highest training-related monthly salary of $10,950 was reported by a respondent in the Process Operator core program in the technology division. Also, one respondent from the industrial training division extension program reported a monthly training-related salary of $9,750. Respondents in the business and entrepreneurial studies division, community services division, nursing division, and technology division reported the lowest salary of $1,133, which is the minimum hourly rate calculated to a monthly salary level (Graph 9).

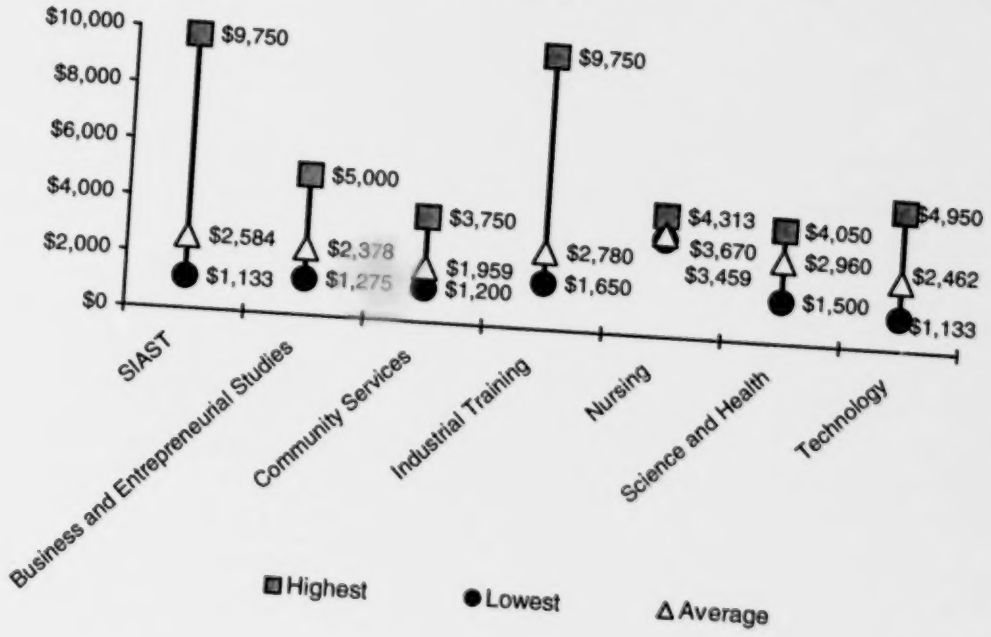
Graph 9: Monthly Salary of Full-Time Training-Related Job, by Division, 2006



3.2 Salaries for Aboriginal Respondents

In all divisions, except for industrial training, the maximum salary level for Aboriginals employed in full-time training-related positions was lower than reported for all respondents. In five divisions – business and entrepreneurial studies, community services, industrial training, nursing, and science and health - the minimum monthly salary levels were marginally higher for Aboriginals than for all respondents. The minimum salary level for Aboriginal respondents in the nursing division was quite high and was skewed by one female respondent in the Basic Critical Care Nursing program who was employed in two jobs at the time of the survey. This respondent considered both jobs as primary when answering the salary question. The average monthly salary for Aboriginals is highest in the industrial training division (Graph 10).

Graph 10: Monthly Salary of Full-Time Training-Related Job for Aboriginal Graduates by Division, 2006



4.0 Industry Sectors of Primary Employers

Saskatchewan Labour has identified the industry sectors listed below as important for the province. Consequently monthly labour force statistics for the province are reported in this manner. The industry sector question was added to the survey in 2004 and 2006 in order to determine if SIAST respondents were employed in these particular industry sectors.

In what industry sector does your primary employer operate? (Question 19)

Though less than reported in the 2004 GES, the majority of SIAST respondents by a large margin (30 percent) reported that they work for employers who operate in the health and social services industry (includes justice/corrections). There is an even distribution of respondents employed in all other identified sectors averaging at 3 percent. The construction industry at 6.2 percent and education services at 8.8 percent are the closest to the health and social services industry.

Table 9 provides a breakdown of industry sectors by division. Understandably, respondents of the nursing and science and health divisions (by 92 and 82 percent respectively) indicated their employers operated in the health and social services sector. Respondents from other divisions may be employed in a variety of industry sectors, but the nursing and science and health respondents are quite limited to the health sector. The 30 percent employed in the health sector may also be impacted by the fact that 26 percent of all respondents to the GES were from the nursing and science and health divisions.

With the other four divisions, there was the opportunity for respondents to be employed in a few different sectors. For instance, in business and entrepreneurial studies, respondents reported 12 percent in the business and professional services sector, 20 percent in the finance, insurance, and real estate sector, and 10 percent with government services, with the remaining respondents distributed amongst the other sectors.

In community services, respondents were primarily employed in the educational services sector (37 percent), as well as the health and social services sector (26 percent) and the hospitality and tourism sector (13 percent).

In industrial training, respondents reported 19 percent employed in the construction and related trades sector, 17 percent in the transportation sector, with another 15 percent in manufacturing.

In technology, respondents were clustered in the construction and related trades sector (20 percent), natural resources sector (14 percent) and technology (11 percent).

Table 9: Industry Sector of Primary Employer, by Division, 2006

Industry Sectors by Division N = 1430	SIAST Overall	Business & Entrepreneurial Studies	Community Services	Industrial Training	Nursing	Science & Health	Technology

5.0 Location of Employment

There is always considerable interest by government officials and the general public to know if post-secondary graduates remain in the province for employment following graduation.

5.1 Location of Primary Employment for SIAST Respondents

Where is the location of your primary employment? (Question 20)

The majority of employed respondents (92 percent) indicated that they were working in Saskatchewan at the time of the survey. The proportion of respondents working in the two major cities, Regina and Saskatoon (52 percent in total), has increased 8 percent from 2004 (Graph 11).

The proportion of respondents who left Saskatchewan to obtain employment remained constant from 2004, at 8 percent. The overall proportion of core respondents who out-migrated did not change at 10 percent. Extension program respondents, with 5 percent of respondents out-migrating in 2006, increased slightly from 4 percent in 2004.

Graph 11: Location of Primary Employment, by Core/Extension, 2006

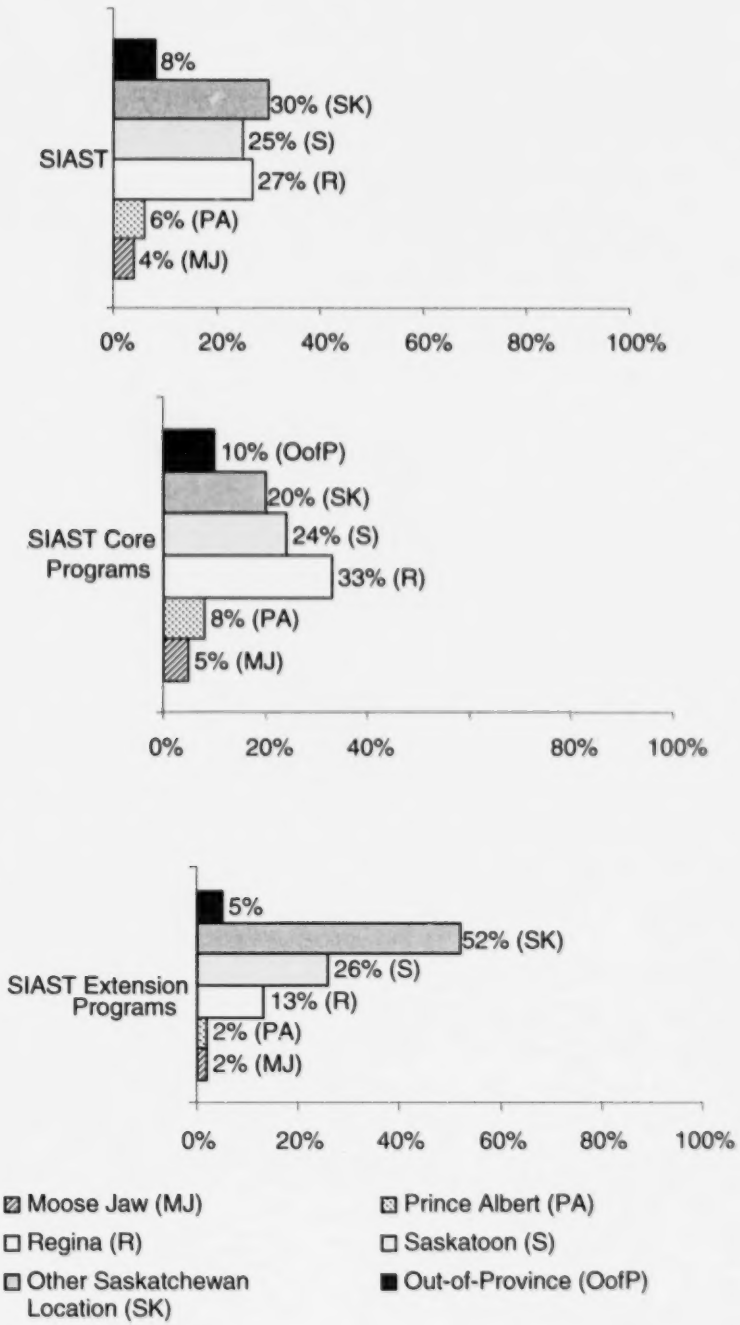

Table 10 provides a breakdown of employment location, by division, by core and extension. The largest out-migration of respondents from core programs continues to be those from the technology division, 18 percent of whom left the province (a two percent increase from 2004). In extension programming, the industrial training division had the largest proportion of respondents leaving Saskatchewan, at 15 percent, an increase of 4 percent from 2004 (Table 10).

Table 10: Location of Primary Employment, by Division, by Core/Extension, 2006

N = 1431	Regina	Saskatoon	Prince Albert	Moose Jaw	Other Sask. Location	Outside Sask.
SIAST Core Programs by Division						
Business and Entrepreneurial Studies	54%	6%	6%	13%	14%	7%
Community Services	22%	32%	17%	1%	18%	10%
Industrial Training	26%	39%	3%	3%	19%	10%
Nursing	47%	18%	9%	1%	19%	6%
Science and Health	24%	25%	9%	2%	33%	7%
Technology	27%	31%	4%	5%	15%	18%
Total SIAST Core Programs	33%	24%	8%	5%	20%	10%
SIAST Extension Programs by Division						
Business and Entrepreneurial Studies	21%	25%	1%	1%	50%	2%
Community Services	10%	26%	7%	3%	52%	2%
Industrial Training	15%	20%	0%	6%	44%	15%
Nursing	7%	41%	0%	0%	48%	4%
Science and Health	7%	23%	0%	2%	68%	0%
Technology	15%	44%	8%	0%	22%	11%
Total SIAST Extension Programs	13%	26%	2%	2%	52%	5%
OVERALL SIAST TOTAL	27%	25%	6%	4%	30%	8%

Consistent with past surveys, the majority of respondents remain in Saskatchewan for employment. In 2004, the location percentages for the Overall SIAST total were:

- Regina – 21%
- Saskatoon – 23%
- Prince Albert – 7%
- Moose Jaw – 4%
- Other Saskatchewan location – 36%
- Outside Saskatchewan - 8%

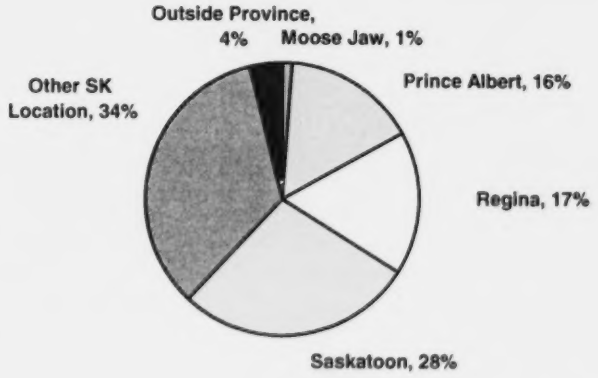
In comparing the 2004 figures to those in 2006, the differences are noticeable in the increase in location of employment in both Regina and Saskatoon and the decrease in the location of employment in rural areas.

5.2 *Location of Primary Employment for Equity Respondents*

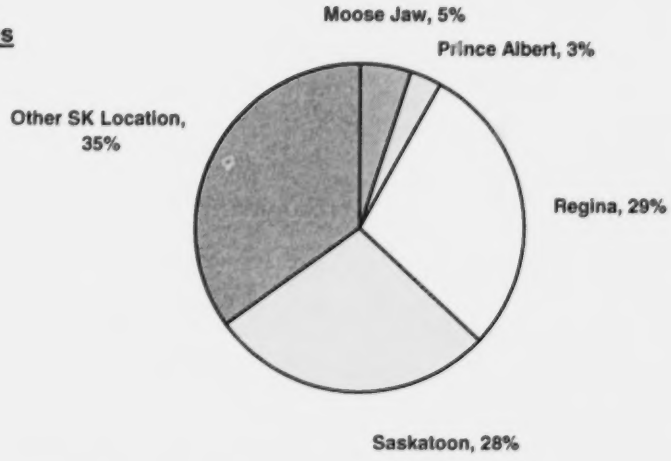
The following graphs highlight where the equity respondents were working at the time of the survey.

Graph 12: Location of Primary Employment for Aboriginal, Persons with Disabilities and Visible Minority Respondents, 2006

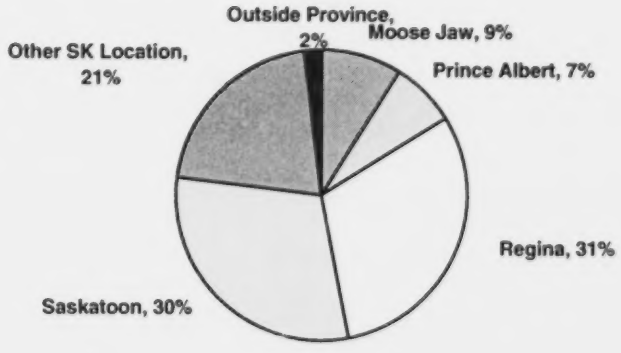
Aboriginal



Persons with Disabilities



Visible Minority



5.3 Out-of-Province Employment for SIAST Respondents

If primary employment was found outside of Saskatchewan, was this by choice? (Q21)

As in 2004, 8 percent of respondents indicated a location of employment outside Saskatchewan. Seventy-four percent (83 of 113) of the respondents who found employment out of Saskatchewan indicated this was by choice. Overall, the nursing (5 of 5 respondents) and the science and health (12 of 13 respondents) divisions had the largest number of respondents who found employment by choice outside Saskatchewan (Table 11).

Table 11: Primary Employment Out-of-Province by Choice, by Division, by Core/Extension, 2006

	Total Respondents	By choice

OVERALL SIAST TOTAL	113	74%

** No respondents in extension programs in the science and health division indicated out-of-province employment.*

Please indicate why you moved out-of-province for employment. (Question 22)

Graduates were requested to identify the main reason they sought employment out-of-province. The most common reason provided for obtaining out-of-province employment was personal reasons (35 percent). Almost one-third of all respondents indicated they moved out-of-province to obtain better wages, while less than one-tenth of all respondents moved in order to find more employment opportunities.

Overall, 69 percent of respondents in the science and health division and 61 percent of respondents in the business and entrepreneurial studies division were more likely to move out-of-province for personal reasons while 50 percent of industrial training respondents moved for better wages (Table 12).

Table 12: Reason Primary Employment Out-of-Province, by Division, by Core/Extension, 2006

6.0 Applications and Interviews for Employment

6.1 Applications

How many employment opportunities have you applied for since completing your training program? (Question 9)

The effort that graduates had invested into obtaining employment, after graduation, was indicated by the number of applications that each had submitted and the number of interviews that each attended. These numbers are expressed as both means and medians, because medians, as the midway number, are not influenced by extreme responses. The average number of applications for employment that respondents in core programs had submitted ranged from eight to fifteen, depending on the division, with an overall average of thirteen. The median number of applications ranged from two to thirteen, again depending on the division, with an overall average of thirteen. Business and entrepreneurial studies and technology respondents in the core programs, consistent with the 2002 and 2004 survey, were at the high end of the range in applications (fourteen and fifteen respectively), while respondents in nursing as well as science and health were at the low end of the range (eight and eleven respectively). The average number of applications for employment that respondents in extension programs submitted ranged from eight to fifteen, depending on the division, with an overall average of eleven. The median number of applicants ranged from two to thirteen, again depending on the division, with an overall average of three. Industrial training and technology respondents in the extension programs were at the high end of the range in applications (twelve and fifteen respectively), while respondents in nursing and science and health were at the low end of the range (eleven and eight respectively; Table 13).

6.2 Interviews

How many employment interviews have you had? (Question 10)

There was little variation in the number of interviews in which respondents participated. The mean number of interviews for respondents in core programs ranged from two to four, depending on division, while the median number ranged from two to three. Similar findings are noted for respondents in SIAST extension programs (Table 13).

Table 13: Employment Applications and Interviews, Average, Mode, and Median, by Division, by Core/Extension, 2006

	Applications			Interviews		
	Average	Mode	Median	Average	Mode	Median

7.0 Not Employed

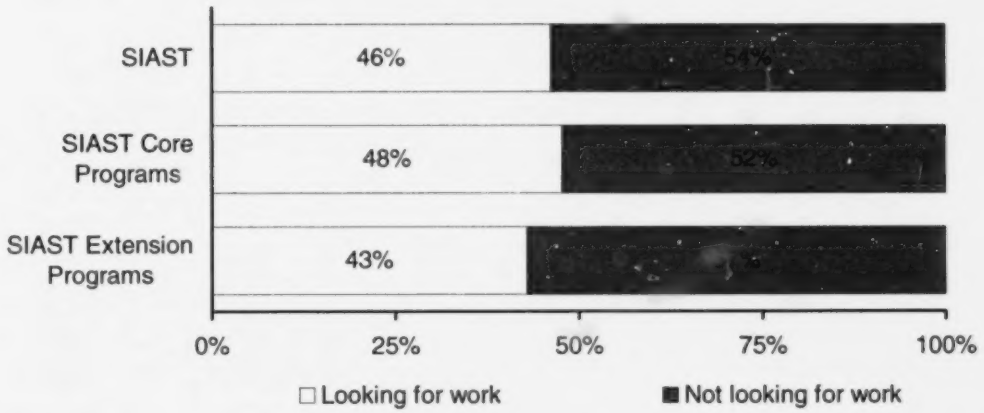
As important as determining the percentage of respondents who obtained employment, was the information to questions about those who were not employed at the time the survey was conducted. Respondents who had indicated in Question 11 that they were not presently employed were asked to complete the questions under the "Not Employed" section of the survey.

7.1 Actively Looking for Work

Are you actively looking for work? (Question 26)

Overall, 46 percent of the respondents (120 of 260), who were not employed at the time of the survey, indicated that they were looking for work. Graph 13 illustrates that respondents who were not employed from core programs were more likely to be looking for work, than their peers in extension programs (48 percent compared to 43 percent in extension programs).

Graph 13: Graduates Not Employed but Looking for Work, by Core/Extension, 2006



7.0 Not Employed

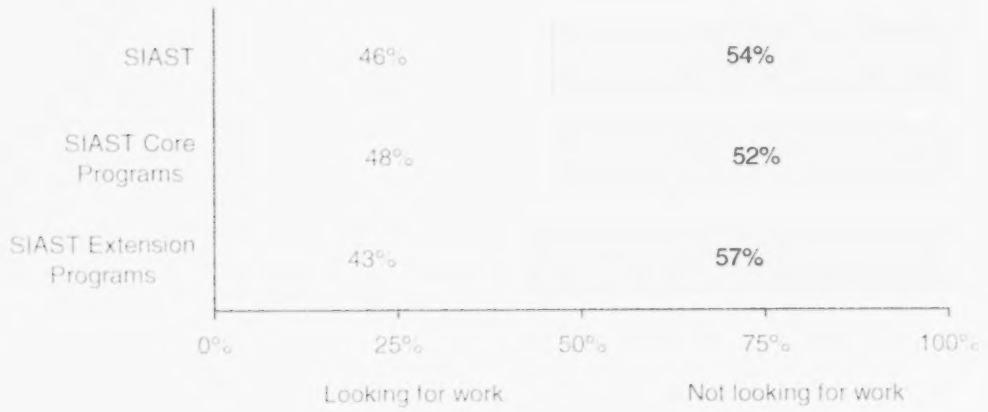
As important as determining the percentage of respondents who obtained employment, was the information to questions about those who were not employed at the time the survey was conducted. Respondents who had indicated in Question 11 that they were not presently employed were asked to complete the questions under the "Not Employed" section of the survey.

7.1 Actively Looking for Work

Are you actively looking for work? (Question 26)

Overall, 46 percent of the respondents (120 of 260), who were not employed at the time of the survey, indicated that they were looking for work. Graph 13 illustrates that respondents who were not employed from core programs were more likely to be looking for work, than their peers in extension programs (48 percent compared to 43 percent in extension programs).

Graph 13: Graduates Not Employed but Looking for Work, by Core/Extension, 2006



7.2 *Employed Since Graduating from SIAST*

Have you worked at all (either full-time, part-time, or casual) since completing your training program? (Question 28)

If yes, was the most recent work directly related to the education and training you received in your program? (Question 29)

Are you scheduled to return to work in the future? (Question 30)

Of the 260 respondents who were not working at the time they were surveyed, 71 percent (184 of 259) indicated that they had worked at some point since completing their training program. Forty-four percent of those respondents (83 of 187 who responded to question) indicated that they were scheduled to return to work at some point in the future.

Of the respondents not working at the time of the survey, but who had worked at some point since completing their training, 53 percent (97 of 183) indicated that they had worked in training-related jobs.

Table 14 provides a breakdown, by division and by core and extension programs, of respondents' work experiences since graduation.

Table 14: Graduates not Employed - Work Experience Since Graduation, by Division, by Core/Extension, 2006

	Have worked since completion of training	Work directly related to training received	Scheduled to return to work
SIAST Core Programs by Division

** Respondents in extension programs in the nursing division indicated that they were all employed.*

7.3. Not Actively Looking for Work

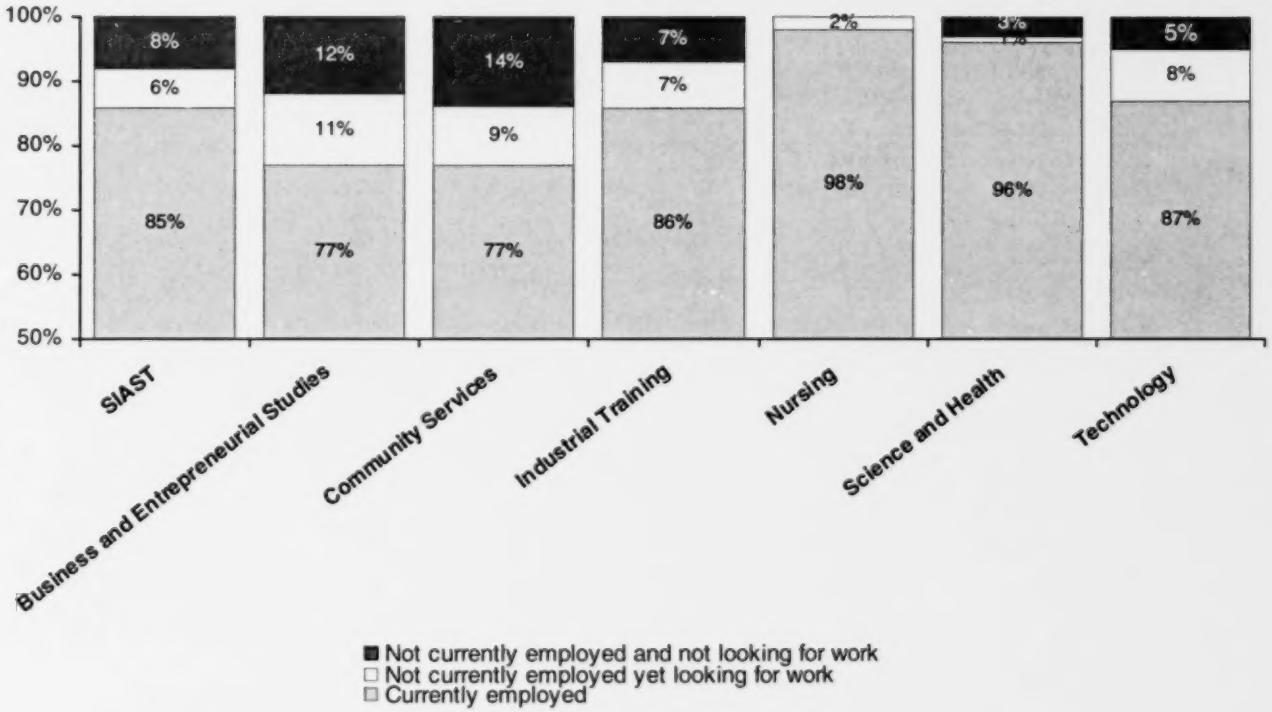
Are you actively looking for work? (Question 26)

Based on the 1,699 SIAST respondents to the survey and those that indicated their employment status, 8 percent (140 of 260) reported they were **not employed and were not looking for work,** primarily because they were not available to work at present.

Section 7.5 of the report identified why some of the unemployed respondents are not actively looking for work. The community services division had the highest proportion of respondents who were not actively looking for work (14 percent not employed and not looking for work), followed by the business and entrepreneurial studies at 12 percent (Graph 14).

The employed (1,437) and the unemployed respondents who stated that they were looking for work (120) represent the SIAST-wide respondent **available workforce (1557)** (those respondents who are available to work).

Graph 14: Graduates Not Actively Looking for Work, by Division, 2006



7.4 *Reason not Currently Employed*

Which of the following best describes the reason why you are currently not employed? (Question 25)

The two most common reasons given by unemployed respondents for not being employed at survey time were *presently not available to work* (30 percent) and *other reasons* (21 percent) as shown below. Table 15 provides a breakdown of the reasons respondents were not employed at the time of the survey by division, and by core and extension programs.

Table15: Graduates Not Employed - Reason Not Employed, by Division, by Core/Extension, 2006

	Total Respondents	Employment seasonal	Further training	No jobs in desired location	Not enough experience	Presently not available to work	No jobs available at all	Other reasons

- Laid off/quit
- No reason, still looking
- Not interested
- Retired
- Term position

7.5 *Reason not Looking for Work*

Which of the following best describes your reason for not looking for work? (Question 27)

Of the 140 of 260 respondents who were not employed and not looking for work, 76 percent of the core respondents and 51 percent of the extension respondents cited the reason as *returned to school to take more education*, followed by *family responsibilities* (10 percent of core respondents and 29 percent of extension respondents; Table 16).

Table 16: Not In Labour Force - Reason Not Looking for Work, by Division, by Core/Extension, 2006

8.0 Further Education or Training

Though some respondents indicated they had *returned to school* in section 7.5 as a reason for *not looking for work* or that they were *enrolled in further training* as a reason for being *not currently employed* in section 7.4, the survey formally asked all respondents if, at the time of the survey (whether employed or not), they were enrolled in further education or training.

8.1 Respondents in Further Education or Training

Are you currently enrolled in an education or training program? (Question 31)

Twenty-five percent of all SIAST respondents, whether employed or not, reported that they were continuing their education at the time of the survey. This is a significant increase of 7 percent over the 2004 response. The largest percentages of respondents enrolled in further education came from core programs in the business and entrepreneurial studies division (38 percent) and extension programs in the technology division (36 percent; Table 17).

Table 17: Graduates Currently Enrolled in Further Education or Training, by Division, by Core/Extension, 2006

8.2 *Type of Further Education or Training*

Which type of training is it? (Question 32)

Fifty-six percent of respondents (232 of 415) who were taking additional education or training at the time of the survey were enrolled in programs at SIAST – either the same SIAST program with a different exit credential or a different program altogether. This is an increase of 12 percent over the 2004 survey. Another 12 percent of respondents continuing their education were enrolled in apprenticeship training programs. Sixteen percent of respondents overall indicated they were in a university training program, while the remaining 16 percent were enrolled in some other post-secondary education *(Graph 15)*.

9.0 Program Completion

Which of the following best describes your reason for completing this program? (Question 5)

Most respondents (63 percent) indicated the reason for completing training was to obtain *employment in a specific field.* However, *change of career* and *updating job skills* were reasons given at 21 percent and 11 percent respectively in addition to 5 percent that indicated *other reasons.* Results varied slightly by division as well as by both core and extension, as shown in Table 19.

Table 19: Reason for Completing SIAST Program, by Division, by Core/Extension, 2006

	Total Respondents	Employment in this field	Update job skills	New skills for change of career	Other reasons
SIAST Core Programs by Division

The majority of "other reasons" specified included:

- Mandated by employer
- Provided with funding
- Good opportunity
- Wanted a hobby
- Personal enrichment/interest

10.0 Program Assessment

All respondents were asked to assess the overall quality of the program(s) they studied at SIAST, the ability of the training to prepare them for employment, and their satisfaction with the overall training they received.

10.1 Quality of Program

Rate the overall quality of the training you received in your program. (Question 7)

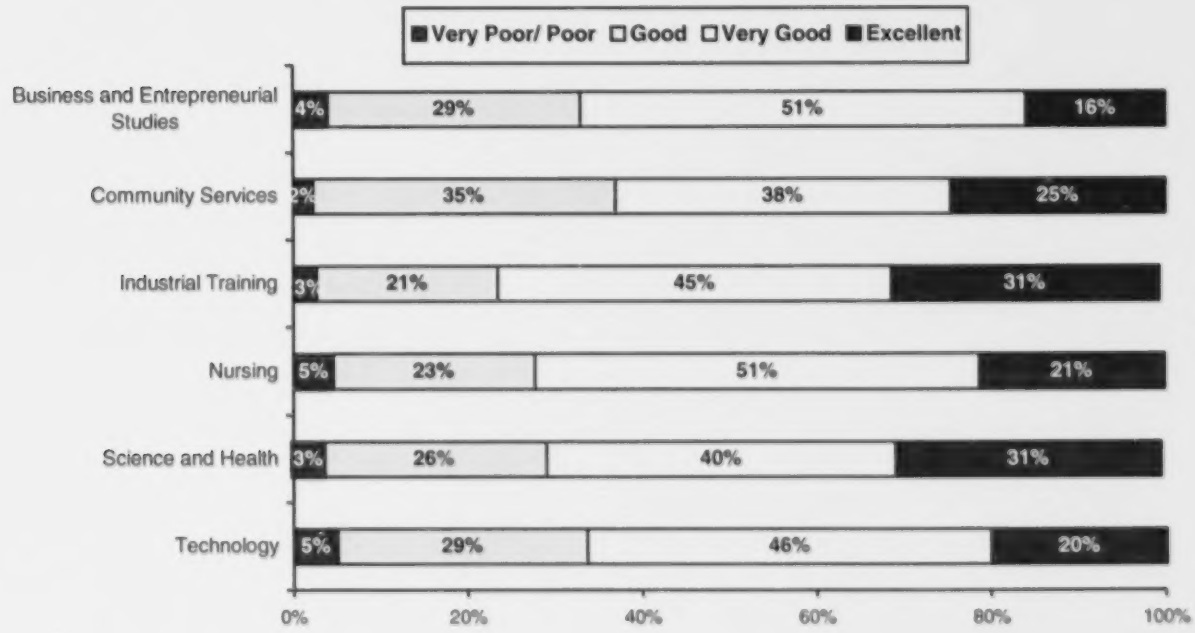
Consistent with the responses in past employment surveys, respondents continue to feel that SIAST provides high quality training. Ninety-six percent of all SIAST respondents to the survey rated the quality of their training positively (good to excellent), as shown in Table 20. Core programs received a slightly higher rating with 69 percent of respondents indicating training was very good to excellent, compared to 68 percent of respondents in extension programs.

Table 20: Overall Quality of Training, by Core/Extension, 2006

	Total Respondents	Excellent	Very good	Good	Poor	Very poor
Total SIAST Core Programs	1184	22%	47%	28%	2%	1%
Total SIAST Extension Programs	515	27%	41%	27%	4%	1%
OVERALL SIAST TOTAL	1699	23%	45%	28%	3%	1%

Graph 16 provides a breakdown of training quality by division. The industrial training, nursing, and science and health divisions received the most favorable ratings from respondents, while the community services division had relatively fewer respondents indicating the programming was very good to excellent.

Graph 16: Overall Quality of Training, by Division, 2006



10.2 Training Preparedness for Employment

Rate your satisfaction with how well the training program prepared you for employment in your field of study. (Question 8)

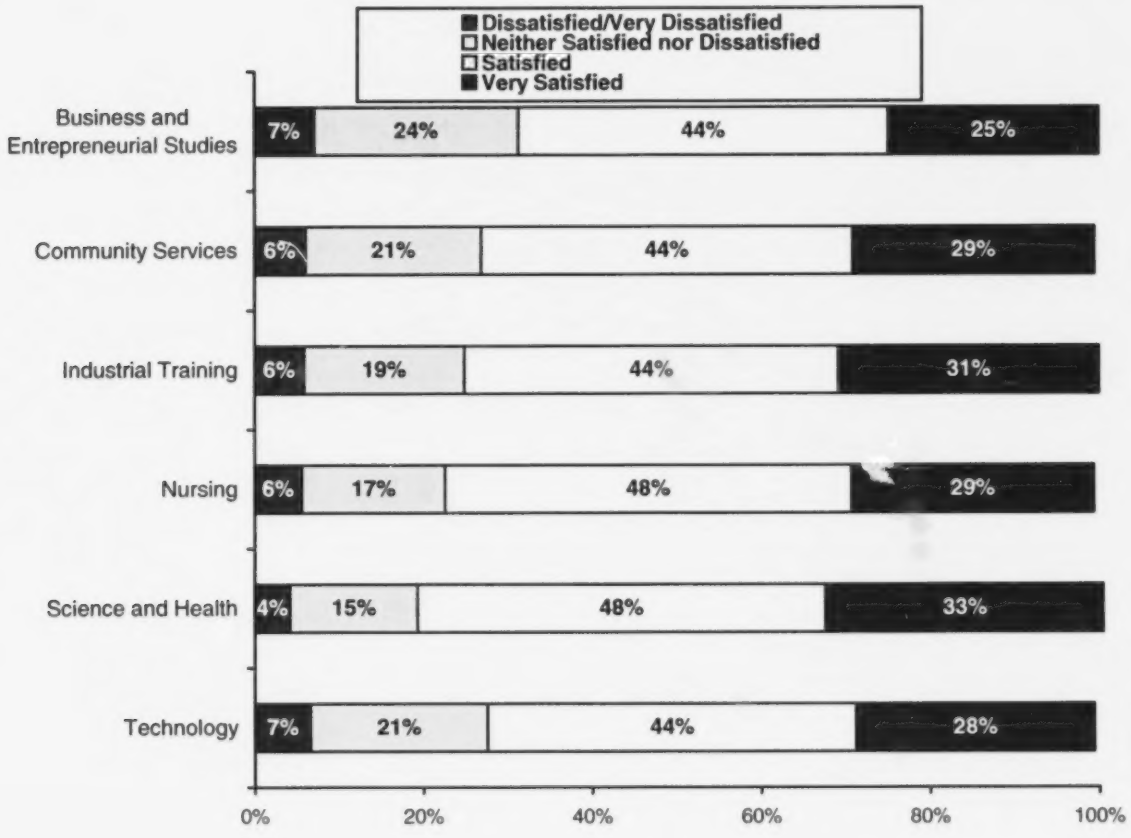
Almost three quarters of all respondents (74 percent) indicated that they were satisfied or very satisfied with how well their training program had prepared them for a training-related job. Table 21 indicates that a slightly higher proportion of respondents from extension programs were satisfied to very satisfied with the training they received to prepare them for employment in their field of study (76 percent compared to 73 percent of respondents from core programs).

Table 21: Training Prepared for Employment in Field of Study, by Core/Extension, 2006

	Total Respondents	Very Satisfied	Satisfied	Neither Satisfied nor Dissatisfied	Dissatisfied	Very Dissatisfied
Total SIAST Core Programs	1184	26%	47%	22%	3%	2%
Total SIAST Extension Programs	515	35%	41%	17%	4%	3%
OVERALL SIAST TOTAL	1699	29%	45%	20%	4%	2%

Graph 17 provides a breakdown of employment preparation by division. The majority of respondents in all divisions were satisfied to very satisfied with the training they received to prepare them for employment in their field of study, from 69 percent of respondents in the business and entrepreneurial studies division to 81 percent of respondents in science and health.

Graph 17: Training Prepared for Employment in Field of Study, by Division, 2006



10.3 Satisfaction with Overall Training

Rate your satisfaction with the overall training you received in your program. (Question 6)

New to the 2006 survey, respondents were asked how satisfied they were with the overall training they received in their program. Overall, respondents indicated high satisfaction with their overall training, with 83 percent indicating that they were satisfied or very satisfied. Respondents from both core programs and extension programs indicated high levels of satisfaction – over 80 percent of respondents reported being satisfied or very satisfied in both program types (Table 22).

Table 22: Satisfaction with Overall Training Program, by Core/Extension, 2006

	Total Respondents	Very Satisfied	Satisfied	Neither Satisfied nor Dissatisfied	Disatisfied	Very Dissatisfied
Total SIAST Core Programs	1184	30%	54%	13%	2%	1%

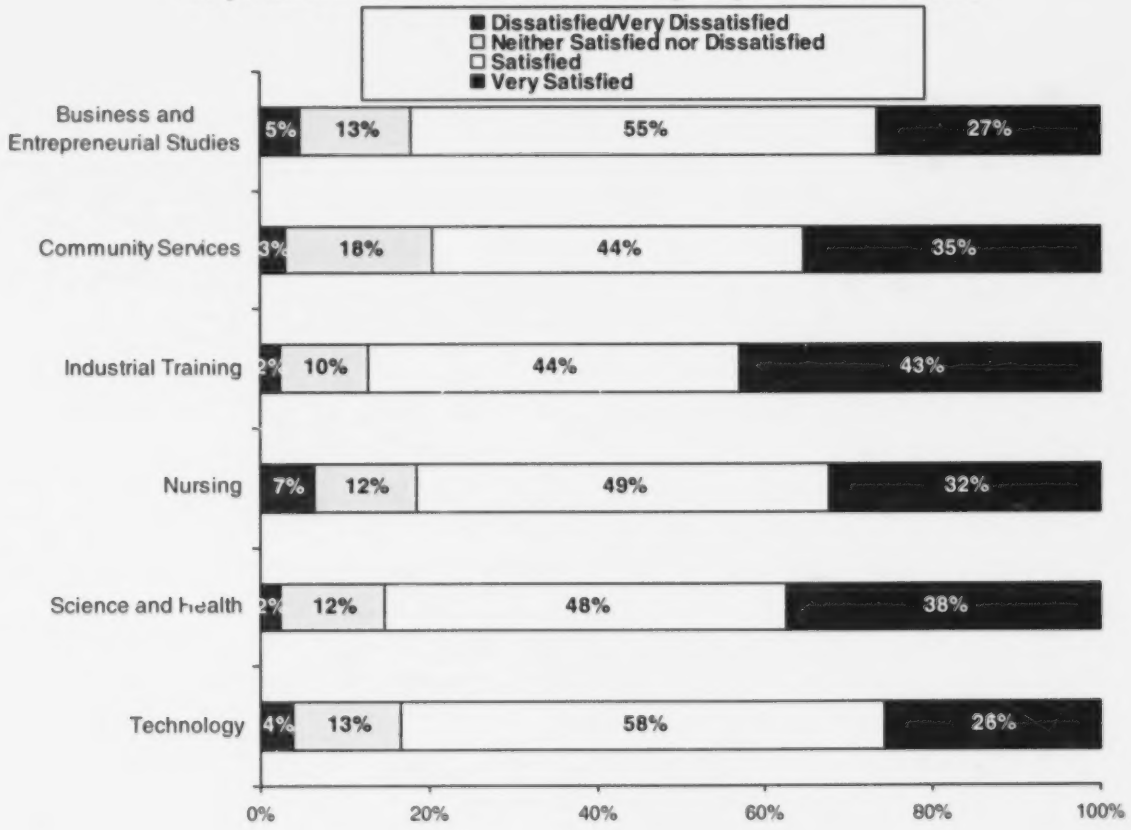
OVERALL SIAST TOTAL	1699	33%	50%	14%	2%	1%

Graph 18 provides a breakdown of training program satisfaction by division. The majority of respondents were satisfied or very satisfied with their training program, from 79 percent of respondents in the community services division to 87 percent of respondents in industrial training.

Graph 18: Satisfaction with Overall Training Program, by Division, 2006



11.0 Demographics

SIAST has a mandate to increase its equity participation both in staffing and students. The Saskatchewan Human Rights Commission permits SIAST to ask participant equity questions. With an education equity policy, the demographics section of the survey is very relevant to SIAST.

11.1 Gender of all Respondents

Identify your gender. (Question 33)

SIAST-wide, there continues to be more female respondents than male, and the composition changes when both core and extension programs are compared. Among respondents of core programs, the split was 58/42 percent female/male, while among respondents of extension programs; the ratio was 70/30 percent, female/male. Overall, 62 percent of SIAST respondents were female and 38 percent male (Table 23, Graphs 19 and 20). In the 2004 study, the SIAST-wide breakdown was 57 percent female and 43 percent male. Gender, as with other equity factors, is a self declaration.

Table 23: Gender, by Division, by Core/Extension, 2006

	Total Respondents	Male	Female
SIAST Core Programs by Division			
Business and Entrepreneurial Studies	290	31%	69%
Community Services	225	18%	82%
Industrial Training	134	88%	12%
Nursing	81	6%	94%
Science and Health	226	27%	73%
Technology	228	76%	24%
Total SIAST Core Programs	1184	42%	58%

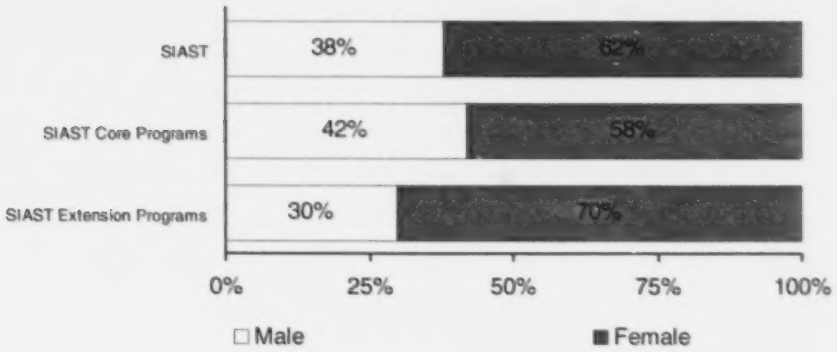
Business and Entrepreneurial Studies	144	13%	87%
Community Services	121	9%	91%
Industrial Training	87	92%	8%
Nursing	27	0%	100%
Science and Health	105	13%	87%
Technology	31	97%	3%
Total SIAST Extension Programs	515	30%	70%
OVERALL SIAST TOTAL	1699	38%	62%

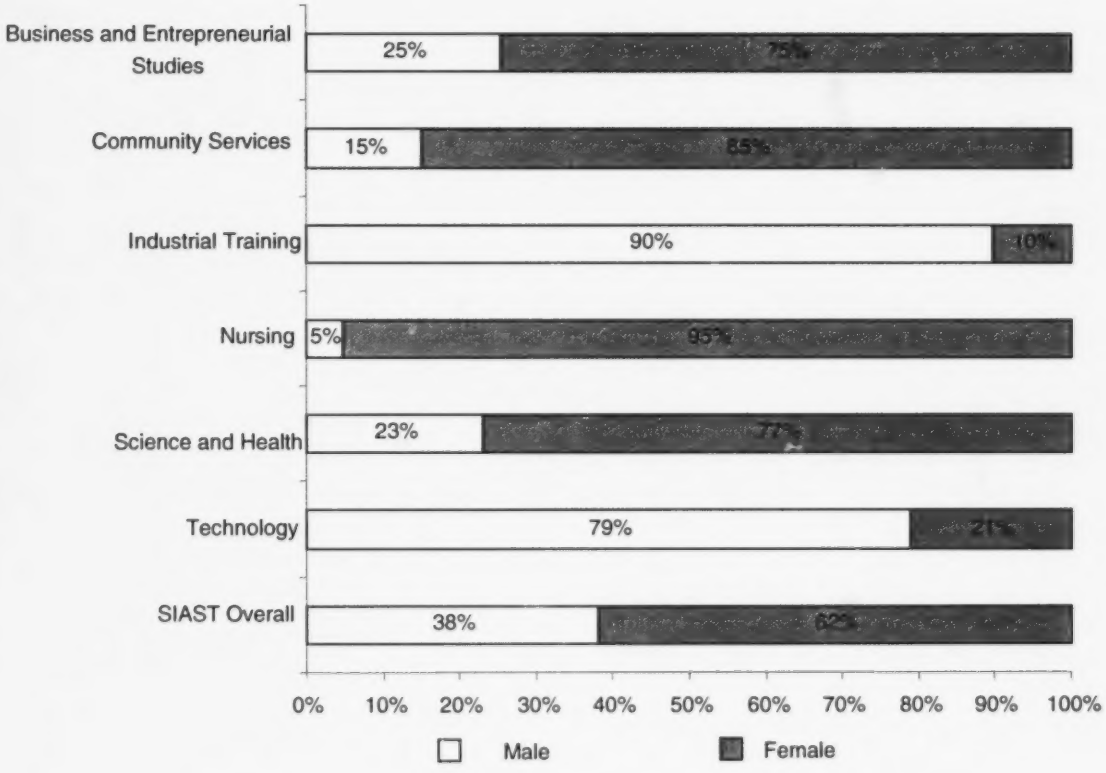
Graph 19: Gender by Core/Extension, 2006



Graph 20: Gender Overall, 2006

Overall, respondents in the industrial training and technology divisions had the largest percentage of males (90 percent and 79 percent respectively), whereas the community services and nursing divisions had the largest percentage of females (85 percent and 95 percent respectively; Graph 21). The program mix in the four above mentioned divisions were most likely a factor in the gender differences. For example, programs in the industrial training division are traditionally male dominated, whereas females traditionally are employed in the nursing sector.

Graph 21: Gender by Division, 2006



11.0 Demographics

SIAST has a mandate to increase its equity participation both in staffing and students. The Saskatchewan Human Rights Commission permits SIAST to ask participant equity questions. With an education equity policy, the demographics section of the survey is very relevant to SIAST.

11.1 Gender of all Respondents

Identify your gender. (Question 33)

SIAST-wide, there continues to be more female respondents than male, and the composition changes when both core and extension programs are compared. Among respondents of core programs, the split was 58/42 percent female/male, while among respondents of extension programs; the ratio was 70/30 percent, female/male. Overall, respondents in the industrial training and technology divisions had the largest percentage of males (90 percent and 79 percent respectively), whereas the community services and nursing divisions had the largest percentage of females (85 percent and 95 percent respectively; Graph 21). The program mix in the four above mentioned divisions were most likely a factor in the gender differences. For example, programs in the industrial training division are traditionally male dominated, whereas females traditionally are employed in the nursing sector.

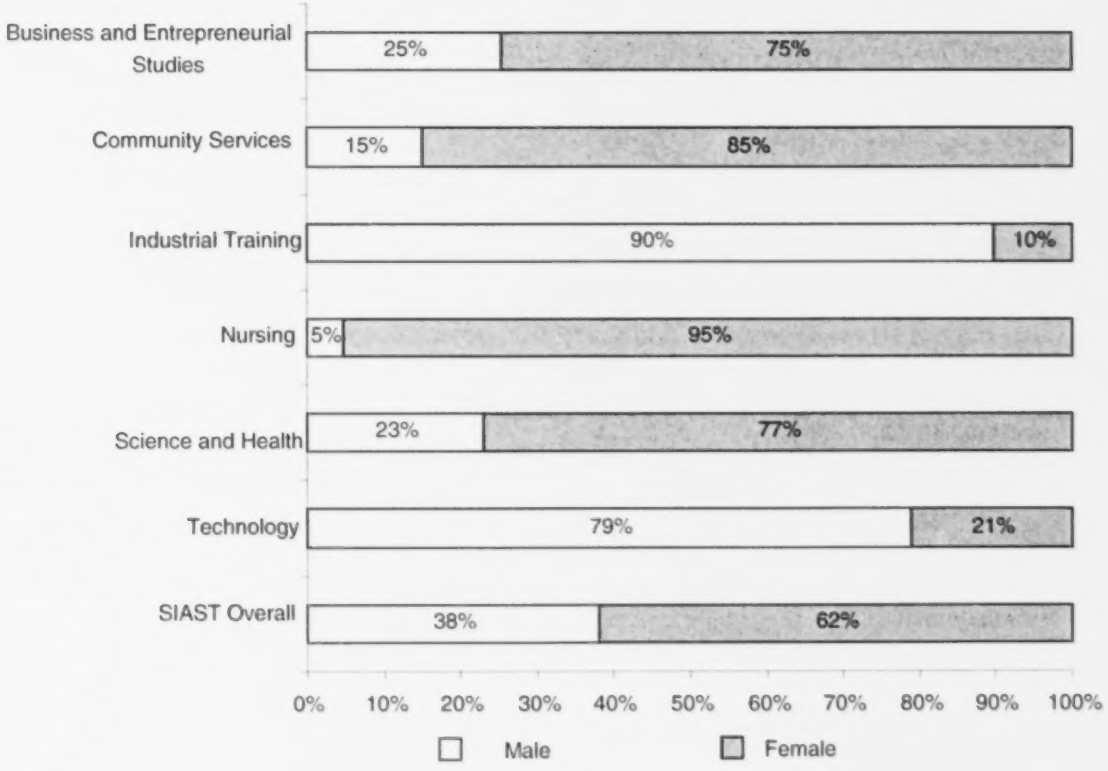
Graph 21: Gender by Division, 2006



11.2 Ages of all Respondents

How old were you on June 30th, 2006? (Question 34)

The average age of SIAST respondents was twenty-eight years, while the median age was twenty-four years (both similar to the 2004 survey results). Respondents of extension programs were significantly older (with the mean and the median age at thirty-two and thirty years of age, respectively) than the core program respondents, whose mean and median ages were twenty-six and twenty-three, respectively.

Between divisions, there was little diversity in the mean age of respondents in core programs, except for respondents in nursing division programs, whose average age was substantially older at thirty-six years for core respondents. This is consistent with the figures in 2004. Also, the Continuing Nursing cluster of programs is part of the nursing division. The participants from these programs have been out working in the field prior to returning to SIAST for additional training. Most of the Continuing Nursing programs are offered through core programming which raises the age level for the nursing division (Table 24, Graph 22).

In SIAST extension programs, respondents in the science and health division had the highest mean age, at thirty-six years. In this division, there is a significantly large number of participants taking the Continuing Care Assistant program through extension. The majority of participants have been out working in the field and attending SIAST for credentialing and they are older in age.

Table 24: Age at June 30, 2006, by Division, by Core/Extension, 2006

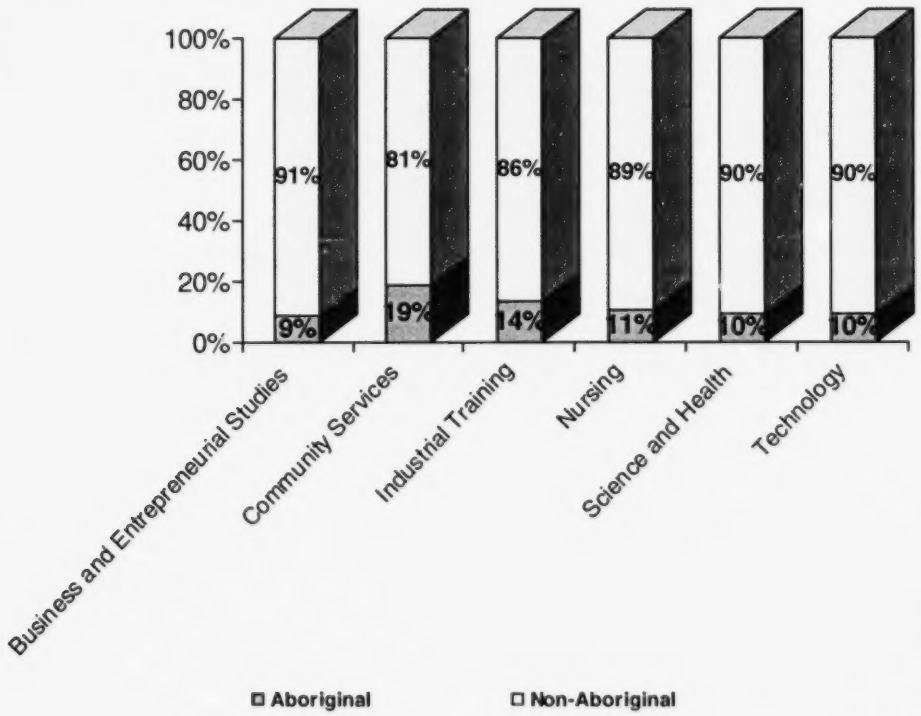
11.3 Aboriginal Ancestry

Are you of Aboriginal ancestry? (Question 35)

The definition of Aboriginal refers to those persons who are First Nations (Registered, Treaty, or Status Indians), Non-status Indians, Métis (those where one parent is of Indian ancestry), and Inuit. Equity status is a self declaration.

Twelve percent of all SIAST respondents indicated that they were of Aboriginal ancestry. Of the core program respondents, 9 percent were of Aboriginal ancestry, a decrease of three percent from the last survey. Eighteen percent of respondents from the extension programs had reported that they were of Aboriginal ancestry (Graph 23).

Graph 23: Aboriginal Ancestry Identification, by Division, 2006



Aboriginal Category

Do you consider yourself Status/Treaty Indian, Métis, Non-Status Indian or Inuit? (Question 36)

The majority of Aboriginal respondents indicated that they were Métis (55 percent) or Status/Treaty Indian (38 percent), while the Non-Status group made up 6 percent and Inuit made up 2 percent (in previous surveys, the Inuit population was less than 1 percent of the overall student population). The change in the percentages indicate that the Status/Treaty figures are higher this year in comparison to 2004, by 2 percent, while the Métis percentage dropped by 4 percent (Table 25).

Table 25: Identified Ancestry Type, by Division, by Core/Extension, 2006

	Total Respondents	Status/Treaty Indian	Métis	Non-Status Indian	Inuit

11.4 Visible Minority Declaration

Do you consider yourself a member of a visible minority? (Question 37)

Graduates were given the option to identify if they were members of a visible minority. The definition of visible minority includes those who are visibly distinguishable from the majority of Canadians on the basis of race or ethnic origin. It does not include those declaring Aboriginal ancestry. Visible Minority respondent numbers decreased slightly from the previous survey, to 6 percent (Table 26).

Table 26: Visible Minority Identification, by Division, by Core/Extension, 2006

	Total Respondents	Visible minority identification
SIAST Core Programs by Division

OVERALL SIAST TOTAL	1699	6%

11.5 Persons with Disabilities Declaration

Do you consider yourself a person with a disability? (Question 38)

Graduates were given the option to indicate if they were persons with disabilities. The definition of a person with a disability includes any person with an ongoing physical, mental, psychiatric, learning or sensory disability that is caused by bodily injury, birth defect or illness.

As in the 2004 survey, 6 percent of respondents indicated that they had a disability. In 2006, 5 percent of core program respondents reported a disability, which is a 2 percent decrease from 2004. Within the core programs, the highest percentages of disabled respondents were in industrial training (8 percent) and community services (7 percent). For extension programs, the highest percentage of disabled respondents was in the science and health division, at 9 percent (Table 27).

Table 27: Persons with Disabilities Identification, by Division, by Core/Extension, 2006

	Total Respondents	Disabilities identification

APPENDICES

APPENDIX A: PROGRAM CHANGES

Revisions to the following programs were recently approved. Some revisions were effective immediately and other revisions not effective until the 2006-07 academic year.

Division/Program Name	Change
Business and Entrepreneurial Studies	
Business Computer Information Systems	Program suspended December 2007 – graduates completing program
Dispute Resolution	Program deleted – graduates completing program
Office Automation/Administration (Diploma)	Program deleted – graduates completing program
Community Services	
Chemical Dependency Worker (Certificate; Woodland)	Program deleted June 2007 – graduates completing program
Chemical Dependency Worker (Diploma)	Program retitled Addictions Counselling (Diploma) - graduates completing Chemical Dependency Worker
Corrections Worker (Diploma)	Program retitled Correctional Studies – graduates completing Corrections Worker
Ecotourism (Certificate)	Program retitled Sustainable Tourism (Applied Certificate) – graduates completing Ecotourism
Cosmetologist (Certificate)	Program retitled Hairstylist – graduates completing Hairstylist
Rehabilitation Worker (Diploma; Kelsey)	Program deleted 2006-07 – graduates completing program
Industrial Training	
Heavy Equipment (Certificate; Kelsey)	Program retitled Heavy Equipment Truck and Transport Technician – graduates completing Heavy Equipment Truck and Transport Technician
Outdoor Power Equipment Technician (OPET) Marine and Lawn and Garden (Certificate; Woodland)	Program suspended - graduates completing program
Science and Health	
Home Care Aide (Certificate)	Program deleted – graduates completing program
Home Care/Special Care Aide	Program retitled Continuing Care Assistant – graduates completing Continuing Care Assistant
Occupational Therapist Assistant/Physical Therapist Assistant (Certificate)	Program suspended 2006-07 – graduates completing program
Special Care Aide	Program deleted – graduates completing program
Technology	
Automotive Service Technology (Year 2; Diploma; Kelsey)	Program suspended 2006-07 – graduates completing program
Electrician (Certificate)	Program credential changed to Applied Certificate – graduates completing certificate program
Electronics Technician (Certificate; Palliser)	Program deleted – graduates completing program
Process Operator (Certificate; Kelsey)	Program deleted – graduates completing program
Underground Miner Core	Program retitled Underground Mining Core – graduates completing program
Water Resources Engineering Technology (Certificate; Palliser)	Program deleted May 2006 – graduates completing program

SIAST
SASKATCHEWAN INSTITUTE OF APPLIED SCIENCE AND TECHNOLOGY

2006 Graduate Employment Survey

December 2006

Dear Graduate:

Every second year, graduates from SIAST programs are asked to complete a graduate employment questionnaire. Responses from the completed questionnaires are collected to produce several reports that provide information to the education, government and private sectors in the province. The data gathered is also used as supporting information in the planning and development of SIAST programs. Your responses inform SIAST about how well we have prepared our graduates for work.

As a recent graduate of a SIAST program, please take a few minutes to complete the 2006 graduate employment questionnaire and return it in the enclosed postage paid envelope. If you have recently graduated from more than one SIAST program, you will receive a separate questionnaire for each program. Please complete the questionnaire for each program.

Participation in this survey is voluntary. Your responses will be recorded in aggregate form (overall totals with all other responses) and therefore will be kept anonymous and confidential. Your co-operation and assistance are both greatly appreciated and we ask that you respond by January 5, 2007. Thank you.

Gertrude McGartland

Gertrude McGartland
Coordinator, Institutional Research and Analysis

General Information

Q1 What is the name of the program from which you graduated?_____

Q2 What is the name of the credential that you received? **(SELECT ONLY ONE)**

_____ Applied Certificate _____ Certificate _____ Advanced Certificate _____ Diploma

Q3 At which SIAST campus or regional college did you take your program? _____

Q4 Please indicate the city or town in which you took your program: _____

Q5 Which of the following best describes your reason for completing this program? **(SELECT ONLY ONE)**
_____ Wanted to be employed in this field
_____ Needed to update my job skills
_____ Needed new skills for a change of career
_____ Other reasons (please specify) _____

Q6 On a scale between 1 and 5, with 1 being ***Very Dissatisfied***, and 5 being ***Very Satisfied***, please rate your satisfaction with the overall training you received in your program? _____

Q7 If you could describe the overall quality of training you received in your program with a word, would the quality of training be:
_____ Excellent _____ Very good _____ Good _____ Poor _____ Very Poor

Q8 On a scale between 1 and 5, with 1 being ***Very Dissatisfied***, and 5 being ***Very Satisfied***, please rate your satisfaction with the training program prepared you for employment in your field of study?

_____

Q9 How many employment opportunities have you applied for since completing your training program? _____

Q10 How many employment interviews have you had? _____

Q11 Are you presently employed?
_____ Yes **(CONTINUE TO Q12)** _____ No **(GO TO Q25)**

EMPLOYMENT INFORMATION – IF YOU ARE PRESENTLY EMPLOYED, COMPLETE Q12-24. IF NOT, GO TO Q25

Q12 How many weeks passed, after you graduated, before you were employed? **(SELECT ONLY ONE)**
_____ One to six weeks
_____ Seven to twelve weeks
_____ Thirteen to eighteen weeks
_____ Nineteen to twenty-four weeks
_____ Other (please specify) _____

Q13 How many jobs do you currently have? _____

Q14 Are you self-employed?
_____Yes _____No

Q15 What is the title of your primary (main) job?

_____

Q16 What is your employment status of your primary job? **(SELECT ONLY ONE)**
_____ Full-time (30 hours or more per week)
_____ Part-time (less than 30 hours per week)
_____ Casual (variety of hours per week)
_____ Other, (please specify) _____

Q17 If your primary job is a part-time or casual position, is this by choice?
_____ Yes _____ No _____ Not Applicable

Q18 What is your hourly salary of your primary job, before deductions?
a. $_____ /hour
b. If your hourly rate is unknown, provide an average monthly salary $_____/month

Q19 In what industry sector does your primary employer operate? (**SELECT ONLY ONE**)

a. _____ Advanced technology, electronics and communication
b. _____ Agriculture/primary industry
c. _____ Business and professional services
d. _____ Construction
e. _____ Education services
f. _____ Film, video, multi-media, printing and publishing
g. _____ Finance, insurance, real estate
h. _____ Government services/Public Administration
i. _____ Health and social services
j. _____ Hospitality and tourism
k. _____ Manufacturing
l. _____ Natural resources and environment
m. _____ Retail and wholesale trade
n. _____ Technology
o. _____ Transportation, trucking, heavy equipment, and utilities
p. _____ Other (please specify) _____

Q20 Where is the location of your primary employment? **(SELECT ONLY ONE)**

_____ Moose Jaw _____ Prince Albert
_____ Regina _____ Saskatoon
_____ Other Saskatchewan location, please specify nearest community_____

(IF YOU ANSWERED ANY OF THE ABOVE LOCATIONS IN SASKATCHEWAN, GO TO Q23)

_____ Outside Saskatchewan, please specify province, or country (if outside Canada) _____
(GO TO Q21)

Q21 If primary employment was found outside of Saskatchewan, was this by choice? _____ Yes_____ No

Q22 Please indicate why you moved out-of-province for employment (**SELECT ONLY ONE**)

_____ Desired employment level only available out-of-province
_____ Better wages, benefits or opportunities for advancement
_____ Personal reasons
_____ Other (please specify) _____
(CONTINUE TO Q23)

Q23 Are you employed in a job directly related to the education and training you received in your program at SIAST?

_____ Yes **(GO TO Q24)** _____ No **(GO TO Q31)**

Q24 If yes, is this training-related job your primary job?

_____ Yes _____ No
(GO TO Q31)

NOT EMPLOYED – IF YOU ARE NOT CURRENTLY EMPLOYED, COMPLETE Q25-30. THOSE WHO ARE EMPLOYED, GO TO Q31

Q25 Which of the following best describes the reason why you are currently not employed? **(SELECT ONLY ONE)**

_____ Employment is seasonal
_____ Require further training
_____ No jobs in desired location
_____ Not enough experience
_____ Not available to work at present
_____ No jobs available at all
_____ Other reason (please specify) _____
(GO TO Q26)

Q26 Are you actively looking for work?

_____ Yes **(GO TO Q28)** _____ No **(CONTINUE TO Q27)**

Q27 Which of the following best describes your reason for not looking for work? **(SELECT ONLY ONE)**

_____ Returned to school to take more education
_____ Health/Disability problems
_____ Family responsibilities
_____ Given up looking
_____ Other reason (please specify) _____
(CONTINUE TO Q28)

Q28 Have you worked at all (either full-time, part-time or casual) since completing your training program?

_____ Yes **(CONTINUE TO Q29)** _____ No **(GO TO Q31)**

Q29 If yes, was the most recent work directly related to the education and training you received in your program?

_____ Yes _____ No

(CONTINUE TO Q30)

Q30 Are you scheduled to return to work in the future?

_____ Yes _____ No

(CONTINUE TO Q31)

FURTHER EDUCATION – ALL GRADUATES TO COMPLETE Q31 AND Q32, WHETHER PRESENTLY EMPLOYED OR NOT

Q31 Are you currently enrolled in an education or training program?

_____ Yes **(CONTINUE TO Q32)** _____ No **(GO TO Q33)**

Q32 Which type of training is it? **(SELECT ONLY ONE)**

_____ The same SIAST program (different credential)
_____ A different SIAST program
_____ A post-secondary program at another institute (other than university)
_____ An apprenticeship program
_____ A university program
_____ Some other program, different from above (please specify) _____

(CONTINUE TO Q33)

DEMOGRAPHICS

Q33 Identify your gender _____ Male _____ Female

Q34 How old were you on June 30th, 2006? _____

Q35 Are you of Aboriginal ancestry? _____ Yes **(CONTINUE TO Q36)** _____ No **(GO TO Q37)**

Q36 If YES, do you consider yourself? ___ Status/Treaty Indian ____ Metis ____ Non-Status Indian ___ Inuit

(GO TO Q37)

Q37 Do you consider yourself a member of a visible minority? _____ Yes _____ No

The definition of a visible minority is: A group of persons, with the exception of Aboriginal people, who are visibly distinguishable from the majority of Canadians on the basis of race, religion, skin colour, national or ethnic origin.

(GO TO Q38)

Q38 Do you consider yourself a person with a disability? _____ Yes _____ No

The definition of a person with a disability is: any person with an ongoing physical, mental, psychiatric, learning or sensory disability that is caused by bodily injury, birth defect or illness.

PLEASE ADD ANY ADDITIONAL COMMENTS THAT YOU WISH TO MAKE:

_____

_____

_____

_____

_____

In conjunction with this graduate survey, SIAST will also be conducting a survey with Saskatchewan employers. The employer survey will be designed to help SIAST meet the employers' future training needs. If you answered **YES** to Question 11 and are currently employed, please provide the contact information of the manager or supervisor who would be able to complete the employer survey.

Name of manager/contact person: _____ Title:_____ Phone #: _____

Name of direct supervisor: _____ Title: _____ Phone #: _____

Company name:
_____

Full address of location where you work _____

City: _____ Postal Code: _____

Thank you for completing this questionnaire.
Please return it as soon as possible in the envelope provided.

APPENDIX C: 2006 SIAST GRADUATE EMPLOYMENT SURVEY - RESPONSES PER QUESTION

The total number of graduates responding to each question varied because:
a) respondents did not always provide answers to all questions, and/or
b) some questions were not relevant to all respondents.
Due to their nature, some questions do not report the number of respondents (e.g., Q1.).

Number of Graduates Surveyed:	**3719**
Number of Respondents:	**1699**

Q1. What is the name of the program from which you graduated?

	# of Respondents to question

Q2. What is the name of the credential that you received?

Applied Certificate	234
Certificate	988
Advanced Certificate	70
Diploma	407
	1699

Q3. At which SIAST campus or regional college did you take your program?

Kelsey	379
Palliser	389
Wascana	432
Woodland	167
Regional college	322
Other location	10
	1699

Q4. Please indicate the city or town in which you took your program.

Q5. Which of the following best describes your reason for completing this program? (Select only one)

Wanted to be employed in this field	1076
Needed to update my job skills	190
Needed new skills for a change of career	347
Other reasons	86
	1699

Q6. On a scale between 1 and 5, with 1 being Very Dissatisfied, and 5 being Very Satisfied, please rate your satisfaction with the overall training you received in your program:

1 Very Dissatisfied	19
2 Dissatisfied	41
3 Neither Satisfied nor Dissatisfied	229
4 Satisfied	851
5 Very Satisfied	559
	1699

Q7. If you could describe the overall quality of training you received in your program with a word, would the quality of training be:

Excellent	397
Very Good	763
Good	477
Poor	44
Very Poor	18
	1699

Q8. On a scale between 1 and 5, with 1 being Very Dissatisfied, and 5 being Very Satisfied, please rate your satisfaction with the training program prepared you for employment in your field of study:

1 Very Dissatisfied	39
2 Dissatisfied	63
3 Neither Satisfied nor Dissatisfied	344
4 Satisfied	767
5 Very Satisfied	486
	1699

Q9. How many employment opportunities have you applied for since completing your training program?

Maximum number	41
Mean number	12
Median number	10

Q10. How many employment interviews have you had?

Maximum number	18
Mean number	3
Median number	2

Q11. Are you presently employed?

Yes	1437
No	262
	1699

RESPONSES TO QUESTIONS FOR THOSE THAT INDICATED THEY WERE PRESENTLY EMPLOYED

Q12. How many weeks passed, after you graduated, before you were employed? (Select only one)

One to six weeks	709
Seven to twelve weeks	147
Thirteen to eighteen weeks	54
Nineteen to twenty-four weeks	62
Other	22
	994

Q13. How many jobs do you currently have?

Maximum	7
Mean	2
Median	2

Q14. Are you self-employed?

Yes	101
No	1336
	1437

Q15. What is the title of primary (main) job?

Q16. What is your employment status of your primary job? (Select only one)

Full-time (30 hours or more per week)	1111
Part-time (less than 30 hours per week)	201
Casual (variety of hours per week)	125
	1437

Q17. If your primary job is a part-time or casual position, is this by choice?

Yes	152
No	160
	312

Q18. What is your hourly salary of your primary job, before deductions?
(Hourly salaries converted to monthly amount and analyzed for **Full-Time Training-Related Employment** only)

Maximum	$10950
Mean	$2597
Median	$2480
Minimum	$1133

Q19. In what industry sector does your primary employer operate? (Select only one)

Advanced Technology, Electronics and Communication	41
Agriculture/Primary Industry	44
Business and Professional Services	61
Construction	88
Education Services	126
Film, Video, Multi-media, Printing and Publishing	9
Finance, Insurance, Real Estate	72
Government Services/Public Administration	68
Health and Social Services	429
Hospitality and Tourism	58
Manufacturing	48
Natural Resources and Environment	52
Retail and Wholesale Trade	58
Technology	40
Transportation, Trucking, Heavy Equipment, and Utilities	50
Other	186
	1430

Q20. Where is the location of your primary employment? (Select only one)

Regina	385
Saskatoon	355
Prince Albert	90
Moose Jaw	59
Other Saskatchewan location	423
Outside Saskatchewan	119
	1431

Q21. If primary employment was found outside of Saskatchewan, was this by choice?

Yes	83
No	30
	113

Q22. Please indicate why you moved out-of-province for employment. (Select only one)

Desired employment level available out-of-province	10
Better wages, benefits, or opportunities for advancement	35
Personal reasons	40
Other	29
	114

Q23. Are you employed in a job directly related to the education and training you received in your program at SIAST?

Yes	1150
No	273
	1423

Q24. If yes, is this training-related job your primary job?

Yes	1116
No	27
	1143

RESPONSES TO QUESTIONS FOR THOSE THAT INDICATED THEY WERE NOT PRESENTLY EMPLOYED

Q25. Which of the following best describes the reason why you are currently not employed? (Select only one)

Employment is seasonal	15
Require further training	54
No jobs in desired location	23
Not enough experience	21
Not available to work at present	78
No jobs available at all	16
Other reason	55
	262

Q26. Are you actively looking for work?

Yes	120
No	140
Not Declared	2
	262

Q27. Which of the following best describes your reason for not looking for work? (Select only one)

Returned to school to take more education	95
Health/Disability problems	5
Family responsibilities	22
Given up looking	3
Other reason	15
	140

Q28. Have you worked at all (either full-time, part-time or casual) since completing your training program?

Yes	184
No	75
	259

Q29. If yes, was the most recent work directly related to the education and training you received in your program?

Yes	97
No	86
	183

Q30. Are you scheduled to return to work in the future?

Yes	83
No	104
	187

RESPONSES TO QUESTIONS ON FURTHER EDUCATION FROM ALL RESPONDENTS

Q31. Are you currently enrolled in an education or training program?

Yes	417
No	1261
	1678

Q32. Which type of training is it? (Select only one)

The same SIAST program (different credential)	127
A different SIAST program	105
A post-secondary program at another institute (other than university)	25
An apprenticeship program	51
A university program	65
Some other program	42
	415

RESPONSES TO DEMOGRAPHIC QUESTIONS FROM ALL RESPONDENTS

Q33. Identify your gender:

Male	645
Female	1054
	1699

Q34. How old were you on June 30th, 2006?

Maximum age	67
Mean age	28
Median age	24
Minimum age	17

Q35. Are you of Aboriginal ancestry?

Yes	203
No	1496
	1699

Q36. If yes, do you consider yourself:

Status/Treaty Indian	77
Métis	111
Non-Status Indian	12
Inuit	3
	203

Q37. Do you consider yourself a member of visible minority?

Yes	98
No	1601
	1699

Q38. Do you consider yourself a person with a disability?

Yes	86
No	1613
	1699
